Khalsa College Amritsar

-An Autonomous College Affiliated to Guru Nanak Dev University, Amritsar.

Session 2017-18

Syllabus: Biotechnology

Post-Graduate Department of Biotechnology

CONTENTS

Class	Page No.
B. Sc. Biotechnology (Semester I-IV)	3 - 136
M. Sc. Biotechnology (Semester I-IV)	137 - 189

B.Sc. Biotechnology

Syllabus SEM I to VI (2017-18)

KHALSA COLLEGE AMRITSAR

SEMESTER-I

Scheme of Courses

Sr.No. Name of the Paper	Total Periods Per week	Theory Marks (32+8*)	Total Periods per week	Practicals Marks (16+4*)
BT-1. Zoology-A	3	40	4	20
BT-2. Botany-A	3	40	4	20
BT-3. Inorganic Chemistry-A	3	40	4	20
BT-4. Organic Chemistry-A Computer & BT-5. Bioinformatics	3	40	4	20
Fundamentals	3	40	4	20
BT-6. Punjabi OR		50		
(Basic Punjabi)		(40+10*)		
BT-7. Communication Skills in English ***Drug Abuse:		50 (40+10*)		
Problem, Management and Prevention (Compulsory)		50 (40+10*)		
BT-8. General Microbiology-A	3	40	4	20
BT-9. Biochemistry - I	3	40	4	20
		380		140

^{*} denotes Internal Assesment

^{***} This paper marks are not included in the total marks.

SEMESTER-II

Scheme of Courses

Sr.No.	Name of the Paper	Total Periods	Theory Marks	Total Periods	Practical marks
		per week	(32+8*)	per week	(16+4*)
BT-1.	Zoology-B	3	40	4	20
BT-2.	Botany-B	3	40	4	20
BT-3.	Inorganic Chemistry-B	3	40	4	20
BT-4.	Organic Chemistry-B	3	40	4	20
BT-5.	Biostatistics	3	40		
BT-6.	Punjabi OR		50		
	Basic Punjabi		(40+10*)		
BT-7.	Communication Skills in English		50 (40+10*)		
	***Drug Abuse: Problem, Management and Prevention (Compulsory)		50 (40+10*)		
BT-8.	General Microbiology-	В 3	40	4	20
BT-9.	Biochemistry - II	3	40	4	20
			380		120

^{*} denotes Internal Assesment

^{***} This paper marks are not included in the total marks.

SEMESTER-III

Scheme of Courses

Sr. No. Name of the Paper	Total Period	ls Theory Marks	Total Periods	Practicals Marks
	per week	(32+8*)	per week	(16+4*)
BT-1 Physical Chemistry-A	3	40	4	20
BT-2 Zoology –C	3	40	4	20
BT-3 Biochemistry-III	3	40	4	20
BT-4 Cell Biology – A	3	40	4	20
BT-5 Basic concepts in Immu	nology 3	40	4	20
BT-6 Genetics	3	40	4	20
BT-7 Agro and Industrial App	lications 3	40	4	20
of Microbes-A				
***ESL-221 Environmental S	hudios	50		
(Compulsory Paper)	ludies	(40+10*)		

Total Marks = 420

280

*** ESL-221 Environmental Studies (Compulsory Paper) Marks will not be included in the Total marks.

140

^{*}Denotes internal assesment

SEMESTER-IV

Scheme of Courses

Sr. No. Name of the Paper	. Name of the Paper Total Periods Theory Marks		Total Periods	Practicals Marks
	per week	(32+8*)	per week	(16+4*)
BT-1 Physical Chemistry-B	3	40	4	20
BT-2 Botany –C	3	40	4	20
BT-3 Biochemistry-IV	3	40	4	20
BT-4 Cell Biology – B	3	40	4	20
BT-5 Immunotechnology	3	40	4	20
BT-6 Molecular Biology	3	40	4	20
BT-7 Agro and Industrial	3	40	4	20
Applications of Microbes-B				
BT-8 Enzymology	3	40	4	20
*** ESL-222 Environmental Stu (Compulsory Paper)		50 (40+10*)		
			320	160

^{*} denotes internal assesment ESL-222 Environmental Studies (Compulsory Paper) Marks will not be included in the total marks.

SEMESTER V

Scheme of Courses

Sr.No.	. Name of the Paper	Total Periods	Theory	Total Perio	ds Practical Marks
		per week	Marks (32+8*)	per week	(16+4*)
BT-1	rDNA Technology -A	3	40	4	20
BT-2	Concepts of Plant Tissue Culture	e 3	40	4	20
BT-3	Animal Tissue Culture	3	40	4	20
BT-4	Patent Laws in Biotechnology	3	40		
BT-5	Bioprocess Engineering - A	3	40	4	20
BT-6	Biophysical and Biochemical Techniques – A	3	40	4	20
BT-7	Physical, Organic & Inorganic Aspects of Spectroscopy- A	3	40	4	20
BT-8	Term Paper	3	-	-	20**
	(i) On recent advances in Life Sciences using Internet and librated resources. To be presente as hard Copy/CD/Floppy. Vival seminar should be conducted	d	280		140

^{*} Denotes internal assessment (BT-1 to BT-7)
** Denotes no internal assessment in the subject (BT-8)

SEMESTER-VI

Scheme of Courses

Sr. No.Name of the Paper	Total Periods	Theory Marks (32+8*)		Practical Marks (16+4*)
	per week		per week	,
BT-1 rDNA Technology –B BT-2 Applications of	3	40	4	20
Plant Tissue Culture	3	40	4	20
BT-3 Animal Biotechnology	3	40	4	20
BT-4 Intellectual Property Rights And Enterepreneurship	d 3	40	-	-
BT-5 Bioprocess Engineering – B	3	40		20**
BT-6 Biophysical and Biochemical Techniques – B	3	40	4	20
BT-7 Physical, Organic & Inorganic Aspects of Spectroscopy- B	3	40	4	20
BT-8 Educational Tour & Written ill Reports. Viva should be condu				20**
		280		140

^{*} Denotes internal assessment (BT-1 to BT-4, BT-6, BT-7)
** Denotes no internal assessment in the subject (BT-5 & BT-8)

B.Sc. Biotechnology (Semester-I) BT - 1 Zoology-A

Theory: 32 Practical: 16

Internal Assessment: 12

Total Marks: 60

Theory

Time: 3 Hrs Maximum Marks: 32

Periods/week: 3

Note for the paper setters/examiners:

Each question paper will consist of three sections as follows:

Section-A: 8 very short answer type questions are to be set, two from each unit, the maximum length of answer can be about 1/3 of a page. All questions are compulsory. Each question will carry one mark, total weightage being 8 marks.

Section-B: This section will comprise of 8 questions, two from each unit. 5 questions to be attempted and maximum length of answer can be upto two pages. Each question will carry 3 marks, total weightage being 15 marks.

Section-C: This section will comprise of four essay type questions, one from each unit. Two questions to be attempted. Maximum length of answer can be upto 5 pages. Each question will carry 4.5 marks, total weightage being 9 marks.

Unit – I

Digestive System: The alimentary canal and associated glands of Man. Teeth: types, dental formula and function. Glands: Pancreas, Liver, Gastric glands. Digestion of dietary constituents, regulation of digestive processes and absorption, Types of nutrition, feeding mechanisms, extra and intracellular digestion, enzymatic digestion, symbiotic digestion.

Unit - II

Circulatory System: General plan of circulation in Man, evolution of heart. Origin and regulation of heart beat, cardiac cycle, electrocardiogram, Cardiac output and fluid pressure, Composition and functions of blood and lymph, Molecular structure and function of haemoglobin, Blood clotting, blood groups including Rh-factor, Homeostasis, Haemopoiesis.

Unit – III

Respiratory System: Respiratory system of man. Different kinds of respiratory mechanisms, Transport of O2 and CO2, Oxygen dissociation of haemoglobin, Bohr effect, chloride shift, Haldane effect, control of breathing.

Unit - IV

Integumentary System: Comparative account of integument and its derivatives in mammals.

Books:

- 1. Goyal, J.P. (2013). Life Sciences-1. Trueman Book Company, Jalandhar.
- 2. Kaur, T. et. al., (2007). A textbook of biotechnology, Life Sciences-1. Lakhanpal Publ., Asr.
- 3. Sobti, R.C. (2005). Introduction to Biotechnology, Part-2, Concepts Tools and Application, Vishal Publishers
- 4. Sobti, R.C. & Nigam, S.K. (2002). Structural & function biology of chordates, Vishal Publishers, Jalandhar.
- 5. Sobti, R.C. & Sharma, V.L. (2005). Basics of Biotechnology: Introduction of Life Sciences. Vishal Publishers, Jalandhar.

B.Sc. Biotechnology (Semester-I) BT-1

Zoology-A (Practical)

Time: 3 Hrs. Max. Marks: 16

Periods/week: 4

Note. The question paper will be set by the examiner based on the syllabus.

- 1. Demonstration of osmosis and diffusion.
- 2. Demonstrate the presence of amylase in saliva, effect of pH and temperature on denaturation.
- 3. Determination of blood groups of human blood samples.
- 4. Recording of blood pressure of man.
- 5. Estimation of hemoglobin content.
- 6. Study of the following prepared slides: histology of rat/rabbit (compound tissues)

BT-2 (Botany - A)

Time: 3 Hours Max. Marks: 40 Credit Hrs.: 3/Week Theory: 32; Int. Ass.: 08

Note for the paper setters/examiners:

Each question paper will consist of three sections as follows:

Section-A: Very short answer type 8 questions are to be set, two from each unit, the maximumlength of answer can be about 1/3 of a page. All questions are compulsory. Each question will carry one mark, total weightage being 8 marks.

Section-B: This section will comprise of 8 questions, two from each unit. 5 questions to be attempted and maximum length of answer can be upto two pages. Each question will carry 3 marks, total weightage being 15 marks.

Section-C: This section will comprise of four essay type questions, one from each unit. Two questions to be attempted. Maximum length of answer can be upto 5 pages. Each question will carry 4.5 marks, total weightage being 12 marks.

Unit – I

Apical Meristem: Tunica corpus and Histogen theories, reproductive apex and development offlower.

Secondary growth in stem and root of *Helianthus*.

Study of anomalous structure in Boerhavia, Nyctanthes, Mirabilis and Dracena.

Unit – II

Structure and development of anther and male gametophyte

Structure and development of ovule and female gametophyte; different types of ovules and embryo sacs

Unit – III

Pollination and fertilization; structure, development and function of endosperm and embryo (dicot and monocot), polyembryony, Self-pollination, cross pollination, male sterility, self incompatibility.

Unit - IV

Terminology pertaining to floral description, taxonomic importance of floral parts of the following families: Solanaceae: *Solanum*, *Petunia*, Liliaceae: *Asphodelus/Asparagus* Rutaceae: *Citrus, Murraya*

Botany- (Practical) BT-2 (Botany - A)

Time: 3 Hours Max. Marks: 20 Credit Hrs.: 4/Week Practical: 16; Int. Ass.: 04

Note. The question paper will be set by the examiner based on the syllabus

Plant Anatomy:

Anatomical studies of normal and abnormal secondary growth in general as mentioned in syllabus.

Embryology:

Study of the permanent slides pertaining to micro and megasporogenesis and female gametophytes and endosperms.

Taxonomy:

- a) Description of flowers including floral diagram, floral formula, V.S. of flower of the representative genera of families mentioned in syllabus.
- b) Identification and short morphological economic note on the specimens included in Units IV & V of the theory paper A.
- c) Each student is required to submit a family wise herbarium consisting of atleast
 20 properly pressed and mounted plants.

Inorganic Chemistry-A

Time: 3 Hrs. Max.Marks:32+08(Internal Assessment)

Periods: 3

Note for the paper setters/examiners:

Each question paper will consist of three sections as follows:

Section-A: 8 very short answer type questions are to be set, two from each unit, the maximumlength of answer can be about 1/3 of a page. All questions are compulsory. Each question will carry one mark, total weightage being 8 marks.

Section-B: This section will comprise of 8 questions, two from each unit. 5 questions to beattempted and maximum length of answer can be upto two pages. Each question will carry 3 marks, total weightage being 15 marks.

Section-C: This section will comprise of four essay type questions, one from each unit. Twoquestions to be attempted. Maximum length of answer can be upto 5 pages. Each question will carry 4.5 marks, total weightage being 9 marks.

Unit - I

Introduction, Wemer's coordination theory, naming of co-ordinate complexes.

Co-ordination numbers 1-12 and their stereo-chemistries. Co-ordination numbers and stereo chemistries of the common transition metal: Ti,V, Cr, Mn, Fe, Co, Ni, Cu, Zn, Mo, & W. Factors affecting co-ordination numbers and stereo-chemistry Isomerism in coordination compounds. (Books Consulted-Number 1,3,8).

Unit – II

Valence bond theory for co-ordinate complexes, inner and outer orbital complexes, electroneutrality and back bonding, limitations of V.B. theory.(**Books 5,9**)

Unit – III

Crystal field theory-Spliting of d-orbitals in octahedral, tetrahedral, cubic and square planer fields of ligands, calculation of C.F.S.E. in high spin and low spin octahedral and high spin tetrahedral complexes, factors affecting the 10 Dq value, structure effects of crystal field splitting (Jahn-Teller distortion). Paramagnetism, diamagnetism, ferro and anti ferromagnetism, Microstates and spectroscopic terms, a calculation of spectroscopic terms for d¹ –d ² electronic configurations using LS coupling, Hunds rule for finding the ground state term, limitations of C.F.T.

Unit - IV

Molecular Orbital Theory- Evidence for covalent character in bonding, MOEL diagram for octahedral and tetrahedral complexes involving σ as well as π bonding, charge transfer transitions.(Books consulted No. 3,4,5,6,7,8)

Books Recommended:

- 1. G.L. Eichorn, Inorganic Biochemistry, Vol. I Elsevier,
- 2. R.Hilgenfeld&W.Saengar, Topics in Current Chemistry, Vol.101.page 38-65.
- 3. J.E. Huheey, Inorganic Chemistry, 3rd ed.
- 4. F.A. Cotton & G. Wilkinson, Advanced Inorganic Chemistry.
- 5. B.E. Douglas & D.H. McDaniel, Concepts & Models of Inorganic Chemistry,1970.
- 6. A. Earnshaw, Introduction of Magnetochemistry, Academic press, 1968.
- 7. R.S.Drago, Physical Methods Inorganic Chemistry, 1971.
- 8. F. Basalo& R.C. Johson, Co-ordination, Chemistry, 1964.
- 9. Cowan, J.A. (1997) Inorganic Biochemistry An In troduction, Wiley-VCH.

Inorganic Chemistry (Practical)

Time: 3 Hrs. Max. Marks: 16+04(Internal Assessment)

Periods: 4

Note: The question paper will be set by the examiner based on the syllabus.

Volumetric Analysis:

Iodimetry, Iodometry, Redox titrations using K2Cr2O7 and KMnO4.

Complexometric titration using EDTA Ca^{++} , Mg^{++} : in context with study of hardness of water.

Organic Chemistry-A

Time: 3 Hrs. Max.Marks:32+08(Internal Assessment)

Periods: 3

Note for the paper setters/examiners:

Each question paper will consist of three sections as follows:

Section-A: 8 very short answer type questions are to be set, two from each unit, the maximumlength of answer can be about 1/3 of a page. All questions are

compulsory. Each question will carry one mark, total weightage being 8 marks.

Section-B: This section will comprise of 8 questions, two from each unit. 5 questions to beattempted and maximum length of answer can be upto two pages. Each question

will carry 3 marks, total weightage being 15 marks.

Section-C: This section will comprise of four essay type questions, one from each unit.

Twoquestions to be attempted. Maximum length of answer can be upto 5 pages. Each question will carry 4.5 marks, total weightage being 9 marks.

ach question will carry 4.3 marks, total weightage being 9

UNIT-I

Conformations of alkanes and cycloalkanes; conformational analysis of ethane, Butane, cyclohexane, monosubstituted and disubstituted cyclohexane, conformation of small, medium and large ring cycloalkanes and of polycyclic ring systems. Factors that affect reaction rates of these reactions, structure and relative stabilities of free radicals, halogenation, mechanism of chlorination of methane, selectivity in chlorination and bromination of higher alkanes .

Alcohols as Bornsted bases and acids, reactions of alcohols with hydrogen halides with detailed mechanism structure and bonding in carbocations and their relative stabilities, potential energy diagrams for chemical reactions.

UNIT-II

Stereochemistry of alkenes, naming stero isomeric alkenes by E-Z system, mechanism of hydrogenation of alkenes, stereochemistry of hydrogenation of cycloalkenes, Dehydration of alcohols and regioselectivity of these reactions, Acid catalyseddehydrohalogenation of alcohols with complete mechanistic discussion, Mechanism of dehydrohalogenation of alkylhalides (E_1 mechanism), stereoselective and antielimination in E_2 reactions, the E_1 Mechanism, electrophilic addition of hydrogen halides to alkenes its regioselectivity explained on the basis of mechanism, free radical addition of hydrogen bromide to alkenes, acid catalysed hydration of alkene with mechanism stereochemistry of halogen addition to alkenes and its mechanistic explanation. Hypohalous acid addition to alkenes, epoxidation of alkenes.

UNIT-III

Stereochemistry: Molecular chirality, enantiomers/symmetry in achiaral structures, chiralcentres in chiral molecules, properties of chiral molecules-optical activity, absolute and relative configuration, the Cahn-Ingold Prelog R-S notional system physical properties of enantiomers. Stereochemistry of chemical reactions that produce chiral centres, chemical reactions that produce stereoisomers, Resolution of enantionmers, chiral centres other than carbon, prochirality.

UNIT-IV

Functional group transformation by nucleophilic substitution, the biomolecular (SN^2) , mechanism of nucleophilic substitution , stereochemistry of SN^2 reactions, how SN^2 reactions occur, steric effect in SN^2 reactions, nucleophiles and nucleophilicity,theunimolecular (SN^1) mechanism of nucleophilies substitution, carbocation stability and the rate of substitution, by the SN^1 mechanism sterochemistry of SN^1 reactions, carbocation real arrangements in SN^1 reactions, solvent effects, subtitution and elimination as competing reactions. The SN^1 - SN^2 continum.

Books Recommended:

- 1. R.T. Morison and R.N. Boyd, Organic chemistry
- 2. I. L. Finar, Organic Chemistry, Vol.I, IV ed. J. March, Advanced Organic Chemistry, Reactions Mechanisms and Structure.
- 3. Schaum's Outlines Series, Theory and Problems of Organic chemistry.
- 4. I.L. Finar, Problems and their solution in Organic chemistry.
- 5. J. D. Robert and M. C. Caserio, Modern Organic Chemistry.
- 6. D. J. Cram and G. S. Hammond, Organic chemistry.
- J. E. Banks, Naming Organic Compounds Programmed Introduction to Organic Chemistry
- 8. E.L. Eliel, Stereochemistry of carbon compounds.
- 9. W. Camp, Organic Spectroscopy.
- 10. F. A. Carey, Organic chemistry.

Organic Chemistry (Practical)

Time: 3 Hrs. Max. Marks: 16+04(Internal Assessment)

Periods: 4

Note: The question paper will be set by the examiner based on the syllabus.

Organic qualitative analysis:

Complete identification including derivation of following organic compounds:

- Aromatic hydrocarbons
- Aldehydes
- Ketones

Carbohydrates

BT -5: Computers & Bioinformatics Fundamentals

Time: 3 Hrs. Max. Marks: 40

Theory Marks: 32

Theory Internal Assessment Marks: 08

Periods: 3

Note for the paper setters/examiners:

Each question paper will consist of three sections as follows:

Section-A: 8 very short answer type questions are to be set, two from each unit, the maximum length of answer can be about 1/3 of a page. All questions are compulsory. Each question will carry one mark, total weightage being 8 marks.

Section-B: This section will comprise of 5 questions, two from each unit. 3 questions to be attempted and maximum length of answer can be up to two pages. Each question will carry 4 marks, total weightage being 12marks.

Section-C: This section will comprise of four essay type questions, one from each unit. Two questions to be attempted. Maximum length of answer can be up to 5 pages. Each question will carry 6 marks, total weightage being 12 marks.

UNIT-I

Computers: General introduction to computers, organization of computers, Computer hardware and software. Data Storage Devices: Primary and secondary Storage devices.

UNIT-II

Input/Output Devices: Key-tape/diskette devices, light pen mouse and joystick. Printed Output: Serial, line, page, printers; plotters, visual output; voice response units.

UNIT-III

Introduction to bioinformatics: History, Pairwise and Multiple Sequence Alignment, Gap Penalties, Significance of Sequence Alignment

UNIT-IV

Primary and Secondary databases, Online resources of Bioinformatics: Introduction about: NCBI, EBI,DDBJ, Expasy, PDB, NDB, Motif and domain databases i.e. Pfam, Prosite, SMART. BLAST(Basic Local Alignment Search Tool).

B.Sc. (BIO-TECHNOLOGY)

SEMESTER-I

Computers & Bioinformatics Fundamentals (Practical)

Time: 3 Hrs. Total Marks: 20

Practical Marks: 16

Practical Internal Assessment: 04

Periods: 4

Practical related to theory shall be carried out for this course.

- 1. Ms-Office: word, Excel, Power-point
- 2. Introduction about Various Databases at NCBI, EMBL, DDBJ.
- 3. GenBank Format, FASTA format etc
- 4. Basic Local Alignment Search tools (BLAST)

B.A. (Hons. – English), B.Sc. (Hons. – Botany, Chemistry, Mathematics, Physics, Zoology), B.Sc. Agri./Bio Tech./IT/FD/ Food Sc./BCA, BJMC B. Com. Ac. & Finance, B. Internet & Mob. Tech., B. Multimedia

2017-18 SEMESTER-I

COMMUNICATION SKILLS IN ENGLISH BCA/B.Sc IT/ Bio Tech/ B.Sc. Agri(Hn)/BFST/BJMC/B.Sc(Fashion Designing)

Time: 3 Hours

Max. Marks: 50

Theory Marks: 30 Presentation: 10 Internal assessment: 10 Lectures /week: 6

Course Contents:

1. Reading Skills: Reading tactics and strategies; Reading purposes–kinds of purposes and associated comprehension; Reading for direct meanings; Reading for understanding concepts, details, coherence, logical progression and meanings of phrases/ expressions.

Activities:

- a) Active reading of passages on general topics
- b) Reading newspaper, articles, editorials etc.
- c) Short questions based on content and development of ideas of a given paragraph.
- **2. Writing Skills**: Guidelines for effective writing; writing styles for application, resume, personal letter, official/ business letter, memo, notices etc.

Activities:

- a) Personal and business letters.
- b) Converting a biographical note into a sequenced resume.
- c) Writing notices for circulation/ boards.
- d) Making notes of given passage with headings and sub-headings
- e) Writing newspaper reports based on given heading.

Suggested Pattern of Question Paper:

The question paper will consist of SIX skill—oriented questions from Reading and Writing Skills. Each question will carry 5 marks. The questions shall be phrased in a manner that students know clearly what is expected of them. There will be internal choice wherever possible.

- i) Comprehension questions of an unseen passage.
- ii) Personal letter Official/Business letters. Writing technical report
- iii) Writing notices/agenda/resolution/ minutes for public circulation on topics of professional interest
- iv) Writing resume or converting a biographical note into resume
- v) Writing news report based on a given heading
- vi) Do as directed Articles Units 69-81

Conjunctions Units 113-120

(6 x5 = 30 Marks)

Presentation:

- 1. 10 Marks for presentation
- 2. Topic for presentation will be based on the skills mentioned in syllabus.
- 3. The Examiner is to be appointed by HOD from among the senior faculty*

Recommended Books:

- 1. Oxford Guide to Effective Writing and Speaking by John Seely.
- 2. The Written Word by Vandana R Singh, Oxford University Press
- 3. Murphy's English Grammar (by Raymond Murphy) CUP

Drug Abuse: Problem, Management and Prevention (Compulsory) Problem Of Drug Abuse

Time: 3 Hours

Max. Marks: 50
Theory Marks: 40; Int ass.: 10

Instructions for the Paper Setters:

Section–A:(15 Marks): It will consist of five short answer type questions. Candidates will be required to attempt three questions, each question carrying five marks. Answer to any of the questions should not exceed two pages.

Section–B: (20 Marks) It will consist of four essay type questions. Candidates will be required

to attempt two questions, each question carrying ten marks. Answer to any of the questions should not exceed four pages.

Section–C: (15 Marks) It will consist of two questions. Candidate will be required to attempt one question only. Answer to the question should not exceed 5 pages.

1) Meaning of Drug Abuse: Concept and Overview, Historical Perspective of Drug Abuse, Drug Dependence, Drug Addiction, Physical and Psychological Dependence: Drug Tolerance and withdrawal symptoms.

2) Types of Abused Drugs and their Effects.

- 1) Stimulants: Amphetamines Benzedrine, Dexedrine, Cocaine.
- 2) Depressants: Alcohol Barbiturates: Nembutal, Seconal, Phenobarbital and Rohypnol.
- 3) Narcotics: Heroin, Morphine, Oxycodone.
- 4) Hallucinogens: Cannabis, Marijuana, Hashish, Hash Oil, MDMA, LSD.
- 5) Steroids.

3) Nature and Extent of the Problem:

Magnitude or prevalence of the menace of Drug Abuse in India and Punjab, Vulnerable groups by age, gender and economic status, Signs and

Symptoms of Drug Abuse: Physical, Academic, Behavioural and Psychological Indicators.

BT - 8 General Microbiology-A

Time: 3 Hrs.

Periods: 3

Int. assessment: 08

Total: 40

Note for the paper setters/examiners:

Each question paper will consist of three sections as follows:

Section-A: 8 very short answer type questions are to be set, two from each unit, the maximum length of answer can be about 1/3 of a page. All questions are compulsory. Each question will carry one mark, total weightage being 8 marks.

Section-B: This section will comprise of 8 questions, two from each unit. 5 questions to be attempted and maximum length of answer can be upto two pages. Each question will carry 3 marks, total weightage being 15 marks.

Section-C: This section will comprise of four essay type questions, one from each unit. Two questions to be attempted. Maximum length of answer can be upto 5 pages. Each question will carry 4.5 marks, total weightage being 9 marks.

Unit - I

Principles of Microbiology- Principles and application of bright field, dark field phase contrast, fluorescence & immunofluorescence, electron microscopy, Modern concept of bacterial nutrition- Introduction, Nutritional forms of bacteria, Transport mechanisms, Microbial culture media, Sterilization- Basic concept, physical and chemical methods of sterilization.

Unit - II

General Features- Bacteria, fungi, Neurospora, yeast and viruses. Microbes in extreme environments- the thermophiles and alkalophiles, culture collection, Methods of purification and preservation

UNIT-III

Nature of the Microbial Cell Surface. Gram positive and gram negative bacteria. Kinds of flagella. Serotypes, Structure and anatomy of bacterial cell walls, Different types of bacterial staining.

Unit - IV

Bacterial Classification: Bacterial classification and taxonomy based on Bergey's Manual of Determinative bacteriology.

Books Recommended:

- 1. Davis, B.D., Dulbecco. R., Eisen, H.N. and Ginsberg, H.S. (1990). Microbiology: 4th Edition, Harper & Row, Publishers, Singapore.
- 2. Tortora, G.J., Funke, B.R. and Case, C.L. (1994). Microbiology: An introduction: 5th Edition, The Benjamin / Cummings Publishing Company, Inc.

- 8. Postgate. J. (2000). Microbes & Man 4th Edition, Cambridge Univ. Press.
- 9. Tortora. G.J., Funke. B.R., 2001. Microbiology: An Introduction, Benjamin Cummings.

BT-8 General Microbiology (Practical)

Time: 3 Hrs. **Practical** : 16 Periods: 4 Int. assessment: 04

Note: The question paper will be set by the examiner based on the syllabus.

Aseptic techniques

Cleaning of glassware

Preparation of media, cotton plugging and sterilization

Personal hygiene-Microbes from hands, tooth-scum and other body parts

Isolation of micro-organism from air, water and soil samples. Dilution and pour plating, Colony purification.

BT - 9 Biochemistry - I

Time: 3 Hrs. Theory: 32
Periods: 3
Int. assessment: 08
Total: 40

Note for the paper setters/examiners:

Each question paper will consist of three sections as follows:

- **Section-A:** 8 very short answer type questions are to be set, two from each unit, the maximum length of answer can be about 1/3 of a page. All questions are compulsory. Each question will carry one mark, total weightage being 8 marks.
- **Section-B:** This section will comprise of 8 questions, two from each unit. 5 questions to be attempted and maximum length of answer can be upto two pages. Each question will carry 3 marks, total weightage being 15 marks.
- **Section-C:** This section will comprise of four essay type questions, one from each unit. Two questions to be attempted. Maximum length of answer can be upto 5 pages. Each question will carry 4.5 marks, total weightage being 9 marks.

Unit - I

Water and its Properties: Role of water in life, Structure of water molecules, Physico-chemical properties of water, Dissociation and association constants, pH and buffers. pI, pka, Hasselbach Hendersson equation and its implications.

Unit - II

Carbohydrates: Introduction, Monosaccharides: Families of monosaccharides: aldoses and ketoses, trioses, tetroses, pentoses, and hexoses, epimers, and anomers of glucose. Furanose and pyranose forms of glucose and fructose, Mutarotation, Structure and functions of Sugar derivatives, Disaccharides; concept of reducing and non-reducing sugars, Haworth projections of maltose, lactose, and sucrose, Structural and functional properties of Polysaccharides: storage polysaccharides - starch and glycogen; Structural Polysaccharides - cellulose, peptidoglycan and chitin.

Unit - III

Structure and role of proteoglycans, glycoproteins and glycolipids (gangliosides and lipopolysaccharides). Carbohydrates as informational molecules.

Unit - IV

Structure of nucleosides and nucleotides. Nucleic acid structure –Watson-Crick model of DNA, Structural features of different types of DNA, Structure of major species of RNA - mRNA, tRNA and rRNA. Nucleic acid chemistry - UV absorption, effect of temperature, acid and alkali on DNA. Structure and functions of biologically important nucleotides as - source of energy, component of coenzymes, second messengers.

Books Recommended:

Bio-Chemistry-I (Practical)

Time: 3 Hrs. Practical: 16
Periods: 4 Int. assessment: 04
Total: 20

Note: The question paper will be set by the examiner based on the syllabus.

- 1. Preparation of physiological buffers.
- 2. Verification of Beer Lamberts Law for P-nitrophenol or cobalt chloride.
- 3. Determination of pKa value of P-nitrophenol
- 4. Estimation of carbohydrate in given solution by anthrone method.
- 5. Estimation of sugar in biological samples by dubois method.
- 6. Estimation of DNA/RNA

Books Recommended:

- 1. Plummer D.T. (1990) An Introduction of Practical Biochemistry. 3rd Ed. Tata McGraw Hill Publishers Co. Ltd., New Delhi.
- 2. Bansal, D.D., Khardori, R. & Gupta, M.M. (1985) Practical Biochemistry. Standard Publication, Chandigarh.
- 3. Sawhney, S.K. and Randhir singh (2001). Introductory Practical Biochemistry. Narosa Publishing House.

Internal Assessment: 12

Total Marks: 60

Theory

Time: 3 Hrs Maximum Marks: 32

Periods/week: 3

Note for the paper setters/examiners:

Each question paper will consist of three sections as follows:

Section-A: 8 very short answer type questions are to be set, two from each unit, the maximum length of answer can be about 1/3 of a page. All questions are compulsory. Each question will carry one mark, total weightage being 8 marks.

Section-B: This section will comprise of 8 questions, two from each unit. 5 questions to be attempted and maximum length of answer can be upto two pages. Each question will carry 3 marks, total weightage being 15 marks.

Section-C: This section will comprise of four essay type questions, one from each unit. Two questions to be attempted. Maximum length of answer can be upto 5 pages. Each question will carry 4.5 marks, total weightage being 9 marks.

Unit - I

Urinogenital System: Structure of kidney and nephron, structure of gonads and urinogenital ducts, Urine formation, water balance in mammals.

Unit -II

Endocrine System: Structure and physiology of thyroid, parathyroid, adrenal, hypothalamus, pituitary, pancreas and gonads of mammals.

Unit –III

Nervous System: Anatomy of brain and cranial nerves of man, Nature, origin and propagation of impulse along the axon, synapse and myoneural junctions. Sense Organs

Unit -IV

Skeletal System: Jaw suspension & visceral arches, (striped, unstriped and cardiac) in man. Ultrastructure, chemical and physiological basis of skeletal muscle contraction.

Books:

- 1. Goyal, J.P. (2013). Life Sciences-1. Trueman Book Company, Jalandhar.
- 2. Kaur, T. et. al., (2007). A textbook of biotechnology, Life Sciences-1. Lakhanpal Publ., Asr.
- 3. Sobti, R.C. (2005). Introduction to Biotechnology, Part-2, Concepts Tools and Application, Vishal Publishers
- 4. Sobti, R.C. & Nigam, S.K. (2002). Structural & function biology of chordates, Vishal Publishers, Jalandhar.
- 5. Sobti, R.C. & Sharma, V.L. (2005). Basics of Biotechnology: Introduction of Life Sciences. Vishal Publishers, Jalandhar.

B.Sc. Biotechnology (Semester-II) BT - 1 Zoology-B (Practical)

Time: 3 Hrs. Max. Marks: 16

Periods/week: 4

Note. The question paper will be set by the examiner based on the syllabus.

1. Study the following system of white rat/rabbit with the help of charts / models / videos :

Digestive, arterial, venous and urinogenital systems.

- 2. Make a temporary preparation of the following: Blood smear of mammals.
- 3. Study of the skeleton of Oryctolagus (Rabbit).and human.
- 4. Analysis of urine for urea, chloride, glucose and uric acid.

As per UGC guidelines and instructions, the use of live materials is to be avoided and be replaced with models, simulated dissections and slides.

BT-2 (Botany – B)

Time: 3 Hours Max. Marks: 40 Credit Hrs.: 3/Week Theory: 32; Int. Ass.: 08

Note for the paper setters/examiners:

Each question paper will consist of three sections as follows:

Section-A: Very short answer type 8 questions are to be set, two from each unit, the maximumlength of answer can be about 1/3 of a page. All questions are compulsory. Each question will carry one mark, total weightage being 8 marks.

Section-B: This section will comprise of 8 questions, two from each unit. 5 questions to be attempted and maximum length of answer can be upto two pages. Each question will carry 3 marks, total weightage being 15 marks.

Section-C: This section will comprise of four essay type questions, one from each unit. Twoquestions to be attempted. Maximum length of answer can be upto 5 pages. Each question will carry 4.5 marks, total weightage being 12 marks.

Unit - I

Systems of classification: Artificial, Natural and Phylogenetic; Salient features of Bentham & Hooker's, Hutchinson and Engler & Prantl's system of classification, (Details of Bentham & Hooker's system only). Angiosperms, Gymnosperms, Bryophytes and Lichens- their general

characteristics.

Unit - II

General characteristics (excluding economic importance) of following families of angiosperms; giving examples of few important genera:

Ranunculaceae: Ranunculus, Delphinium

Brassicaceae: Brassica

Apiaceae (Umbelliferae): Coriander

Asteraceae (Compositae): Helianthus, Sonchus, Ageratum

Lamiaceae (Labiatae): Ocimum/Salvia

Unit – III

General characteristics (excluding economic importance) of following families of angiosperms; giving examples of few important genera:

Fabaceae: *Lathyrus, Cassia* and *Acacia*; Orchidaceae: *Zeuxine*; Poaceae (Graminae): *Triticum* Criteria for primitive and advanced nature of families and flower. Evolutionary status of Ranunculaceae, Compositae, Orchidaceae.

Unit - IV

Introduction to seed biology, differences between seed and grain. Classification of seed-breeder, foundation, certified and truthfully labeled seeds (TFLs). Brief introduction to methods of seed production, seed testing (seed germination and seed viability test) and seed certification.

Botany- (Practical) BT-2 (Botany - B)

Time: 3 Hours Max. Marks: 20 Credit Hrs.: 4/Week Practical: 16; Int. Ass.: 04

Note. The question paper will be set by the examiner based on the syllabus

- a) Description of flowers including floral diagram, floral formula, V.S. of flower of the representative genera of families mentioned in syllabus.
- b) Identification and short morphological economic note on the specimens included in Units III, IV & V of the theory paper B.

Each student is required to submit a family wise herbarium consisting of at least 20 properly pressed and mounted plants.

Inorganic Chemistry-B

Time: 3 Hrs. Max.Marks:32+08(Internal Assessment)

Periods: 3

Note for the paper setters/examiners:

Each question paper will consist of three sections as follows:

Section-A: 8 very short answer type questions are to be set, two from each unit, the maximumlength of answer can be about 1/3 of a page. All questions are compulsory. Each question will carry one mark, total weightage being 8 marks.

Section-B: This section will comprise of 8 questions, two from each unit. 5 questions to beattempted and maximum length of answer can be upto two pages. Each question will carry 3 marks, total weightage being 15 marks.

Section-C: This section will comprise of four essay type questions, one from each unit. Twoquestions to be attempted. Maximum length of answer can be upto 5 pages. Each question will carry 4.5 marks, total weightage being 9 marks.

Unit - I

л-Acid ligands

Carbon monooxide complexes, Two methods of preparation, structural and bonding in (linear MCO groups, polynuclear metal carbonyls carbonyl hydrides and halides). Complexes of N_2 , with Ru and No with Fe.(Book consulted, No. 4 Chapter 2)

Unit - II

Alkali metal and alkaline earth metal chelators

Definition and few examples of macrocyclic ligands, macrocyclic effect, crown ethers &podands, coronauds, cryptands, structure of 18 crown -6 complex with KNCS, ion cavity complex, effect of anion on phase transfer catalysis, sandwich formation, cryptands and their cation complexes. (Book No. 2 pages 38-65).

Unit –III

Stability of co-ordination compounds

Introduction Factors affecting the stability of metal ion complexes with general ligands and some biochemical ligands like amino acids, peptides, nucleotides and Nucleic acids and porphyrin (Book consulted No. 1 Chapter 2).

Unit - IV

Metal ions in biological system

Fe: Haemoglobin, structure and functions, oxygen transport, Bohr effect.

Mg: Chlorophyll structure and function in photosysthesis.

Zn: Carboxypeptidase enzyme functions.

(Book consulted, No. 9 Page No. 37-76).

Inorganic Chemistry (Practical)

Time: 3 Hrs.. Max. Marks: 16+04(Internal Assessment)

Periods: 4

Note: The question paper will be set by the examiner based on the syllabus.

- Inorganic qualitative analysis:

Four ions (Two cations two anions).

- A. <u>Preliminary tests:</u> Physical examination, Dryheating test, charcoal cavity test, Co(NO₃)₂ test, flame test, borax bead test.
- B. Acid radical analysis:

$$\begin{array}{l} \text{Dil H}_2\text{SO}_4\text{gp: CO}^2 \text{-}_3, \text{NO}_2 \text{-}, \text{S}^2 \text{-}, \text{SO}_3^2 \text{-} \\ \text{Conc, H}_2\text{SO}_4\text{gp: Cl}, \text{Br}, \text{I}, \text{NO}_3, \text{CH}_3\text{Coo} \\ \text{Individual gp: SO}_4^2 \text{-}, \text{PO}_4^3 \text{-}, \text{BO}_3^3 \end{array}$$

C. <u>Basic radical analysis:</u> NH₄ $^{+}$ Pb²⁺, Cu²⁺, Cd²⁺, Fe²⁺ or Fe³⁺, Al³⁺, Co²⁺, Ni²⁺, Mn²⁺, Zn²⁺, Ba²⁺, Sr²⁺, Ca²⁺Mg²⁺, Na⁺, K⁺ and their confirmation.

Organic Chemistry-B

Time: 3 Hrs. Max.Marks:32+08(Internal Assessment)

Periods: 3

Note for the paper setters/examiners:

Each question paper will consist of three sections as follows:

Section-A: 8 very short answer type questions are to be set, two from each unit, the maximumlength of answer can be about 1/3 of a page. All questions are

compulsory. Each question will carry one mark, total weightage being 8 marks.

Section-B: This section will comprise of 8 questions, two from each unit. 5 questions to beattempted and maximum length of answer can be upto two pages. Each question

will carry 3 marks, total weightage being 15 marks.

Section-C: This section will comprise of four essay type questions, one from each unit.

Twoquestions to be attempted. Maximum length of answer can be upto 5 pages.

Each question will carry 4.5 marks, total weightage being 9 marks.

Unit -I

Acidity of acetylene and terminal alkenes, metal ammonia reduction of alkyne, addition of hydrogen halides and water to alkyne, with detailed discussion of mechanism of these reaction, the Diels Alder reaction, orbital symmetry and the Diels alder reaction.

Unit-II

Conversion of alcohol to ether and ester with full dicussion of the reaction, crown ethers, conversion of vicinal halohydrin to epoxides, nucleophillic ring opening reaction of epoxides, acid catalysed ring opening of epoxides.

Unit-III

Principles of nucleophillicadditon to carbonyl groups: Hydration ,acetal formation, cyanohydrin formation; reaction with primary and secondary amines, Wittig reaction, steroselective addition to carbonyl groups mechanism of halogenation, acid and base catalysedcholization, haloform reaction, aldolcondensaton, conjugate nucleophillicadditon to unsaturated carbonyl compounds.

Unit - IV

Mechanism of acid- catalysedesterification, intramolecular ester formation lactone), Hell-Volerid-Zelinsky reaction, decarboxylation of malonic acid and related compounds. Mechanism of hydrolysis of acid chlorides, acid anhydrides, acid and base catalysed hydrolysis of esters, acid assisted hydrolysis of amides. Hoffman rearrangement of N-bromoamides. Hydrolysis of nitriles, claisencondensation, the Deckmann condensation, acetic ester synthesis, malonic ester synthesis, Michael reaction Reformatsky reaction.

- 1. R.T. Morison and R.N. Boyd, Organic Chemistry

- 7. D. J. Cram and G. S. Hammond, Organic Chemistry.
- 8. J. E. Banks, Naming Organic Compounds Programmed Introduction to Organic Chemistry
- 9. E.L. Eliel, Stereochemistry of Carbon Compounds.
- 10. W. Camp, Organic Spectroscopy.
- 11. F.A. Carey, Organic Chemistry.

Organic Chemistry (Practical)

Time: 3 Hrs. Max. Marks: 16+04(Internal Assessment)

Periods: 4

Note: The question paper will be set by the examiner based on the syllabus.

Organic qualitative analysis:

Complete identification including derivation of following organic compounds:

- Amides
- Amines

Carboxylic acids and phenols.

Khalsa College Amritsar

(An Autonomous College)
Syllabus for
B.Sc. (BIO-TECHNOLOGY) (SEMESTER-II)
Session-2017-2018

BT-5 Biostatistics

Time: 3 Hrs. Max. Marks: 32
Periods: 3 per week Internal assessment: 08
Total: 40

Instructions for the paper setters/examiners:

Each question paper will consist of three sections as follows:

Section-A: 8 very short answer type questions are to be set, two from each unit, the maximum length of answer can be about 1/3 of a page. Seven questions are to be attempted. Each question will carry one mark, total weightage being 7 marks.

Section-B: This section will comprise of 8 questions, two from each unit. 5 questions to be attempted and maximum length of answer can be upto two pages. Each question will carry 3 marks, total weightage being 15 marks.

Section-C: This section will comprise of four essay type questions, one from each unit. Two questions to be attempted. Maximum length of answer can be upto 5 pages. Each question will carry 5 marks, total weightage being 10 marks.

UNIT-I

Elementary Statistics: The mean, median, mode, standard deviation, variance, covariance of data.

UNIT-II

Probability: Basic concepts, sample space and events, use of counting method in probability, addition law, sample problems involving the estimation of probabilities, Conditional Probability and Independent Events, Bayes theorem.

UNIT-III

Introduction to Correlation & Regression: Scatter diagram, Linear correlation, linear regression lines.

UNIT-IV

Hypothesis Testing: Concept of Null and Alternate Hypothesis, Chi-square test (Goodness of fit and association of attributes).

Recommended books:

2017-18 SEMESTER-II COMMUNICATION SKILLS IN ENGLISH BCA/B.Sc IT/ Bio Tech/B.Sc Agri(Hn)/BFST/BJMC/B.Sc(Fashion Designing)

Time: 3 Hours

Max. Marks: 50

Theory Marks: 30 Presentation:10 InternalAssessment:10 Lecture/ week: 6

Course Contents:

1. Listening Skills: Barriers to listening; effective listening skills; feedback skills, attending telephone calls; note taking.

Activities:

- a) Listening exercises Listening to conversation, speech/lecture and taking notes.
- 2. Speaking and Conversational Skills: Components of a meaningful and easy conversation; understanding the cue and making appropriate responses; forms of polite speech; asking and providing information on general topics, situation based Conversation in English; essentials of Spoken English

Activities:

- a) Conversation; dialogue and speech
- b) Oral description or explanation of a common object, situation or concept.
- c) Interviews and group discussion

Suggested Pattern of Question Paper:

The question paper will consist of SIX skill-oriented questions from listening and speaking Skills. Each question will carry 5 marks. The questions shall be phrased in a manner that students know clearly what is expected of them. There will be internal choice wherever possible.

- i) Making summary/ précis or paraphrasing of an idea of a given passage.
- ii) Writing a paragraph of expository or argumentative nature of a given topic.
- iii) Interpretation of a given data, chart, diagram etc and making a brief report.
- iv) Transcoding (given dialogue to a prose or given prose to dialogue).
- v) Write a press note on college activities.
- vi) Do as directed change of voice Units 42-46*

(6X5 = 30Marks)

Presentation:

- a. 10 Marks for presentation
- b. Topic for presentation will be based on the skills mentioned in syllabus
- c. The Examiner is to be appointed by HOD from among the senior faculty*

Recommended Books:

- 1. Oxford Guide to Effective Writing and Speaking by John Seely.
- 2. The Written Word by Vandana R Singh, Oxford University Press
- 3. Murphy's English Grammar (by Raymond Murphy) CUP

Drug Abuse: Problem, Management and Prevention (Compulsory)

Drug Abuse: Management and Prevention

Time: 3 Hours

Max. Marks: 50
Theory Marks: 40; Int ass.: 10

Instructions for the Paper Setters:

Section–A:(15 Marks): It will consist of five short answer type questions. Candidates will be required to attempt three questions, each question carrying five marks. Answer to any of the questions should not exceed two pages.

Section–B: (20 Marks) It will consist of four essay type questions. Candidates will be required

to attempt two questions, each question carrying ten marks. Answer to any of the questions should not exceed four pages.

Section–C: (15 Marks) It will consist of two questions. Candidate will be required to attempt one question only. Answer to the question should not exceed 5 pages.

1) Consequences of Drug Abuse for:

- 1) Individual Education, employment and income issues.
- 2) Family Violence
- 3) Society Crime.
- 4) Nation Law and order problem.

2) Management of Drug abuse:

- 1) Medical Management: Medication for treatment and to reduce withdrawal effects, Drug De-addiction clinics, Relapse management.
- 2) Psycho-Social Management: Counselling, family and group therapy, behavioural and cognitive therapy, Environmental Intervention.

3) Prevention of Drug Abuse:

1) Role of family: Parent child relationship, Family support, Supervision, Shaping values, Active Scrutiny.

2) School

Counselling, Teacher as role-model. Parent-Teacher-Health Professional Coordination, Random testing on students.

3) Media:

Restraint on advertisements of drugs, advertisements on bad effects of drugs, Publicity and media, Campaigns against drug abuse, Educational and awareness program

4) Legisltaion: NDPs act, Statutory warnings, Policing of Borders, Checking Supply/Smuggling of Drugs, Strict enforcement of laws, Time bound trials.

BT - 8 General Microbiology–B

Time: 3 Hrs. Theory: 32
Periods: 3
Int. assessment: 08
Total: 40

Note for the paper setters/examiners:

Each question paper will consist of three sections as follows:

Section-A: 8 very short answer type questions are to be set, two from each unit, the maximum length of answer can be about 1/3 of a page. All questions are compulsory. Each question will carry one mark, total weightage being 8 marks.

Section-B: This section will comprise of 8 questions, two from each unit. 5 questions to be attempted and maximum length of answer can be upto two pages. Each question will carry 3 marks, total weightage being 15 marks.

Section-C: This section will comprise of four essay type questions, one from each unit. Two questions to be attempted. Maximum length of answer can be upto 5 pages. Each question will carry 4.5 marks, total weightage being 9 marks.

Unit - I

Microbial Growth: Bacterial generation doubling time and specific growth rate. Monoauxic, diauxic and synchronised growth curve. Sporulation and regeneration of bacteria

Unit - II

Classification of viruses- Properties used for classification, classification based on differences in their transcription processes, Plant and animal viruses- structure and composition, Virus replication- Tobacco Mosaic Virus and Herpes simplex, Cultivation of plant and animal viruses, Bacteriophages- Classification, Life cycle of bacteriophage.

Unit- III

Pathogenic micro-organisms- Factors contributing microbial pathogenicity (Adhesion, Invasiveness and toxigenicity), Natural resistance and Non specific defense mechanism against microorganisms. Symbiosis and antibiosis among microbial populations, N2-fixing microbes in agriculture- Nitrogen cycle, Nitrogen Fixation process.

Unit - IV

Microbial metabolism- Glycolysis, Kreb's Cycle and Electron transport chain, Fermentation products- Alcohol, Cheese and Bread, A survey of products from micro-organisms, Production of heterologous proteins of interest in micro-organisms.

BT - 9 Biochemistry - II

Time: 3 Hrs. Theory :32
Periods: 3 Int. assessment:08
Total :40

Note for the paper setters/examiners:

Each question paper will consist of three sections as follows:

- **Section-A:** 8 very short answer type questions are to be set, two from each unit, the maximum length of answer can be about 1/3 of a page. All questions are compulsory. Each question will carry one mark, total weightage being 8 marks.
- **Section-B:** This section will comprise of 8 questions, two from each unit. 5 questions to be attempted and maximum length of answer can be upto two pages. Each question will carry 3 marks, total weightage being 15 marks.
- **Section-C:** This section will comprise of four essay type questions, one from each unit. Two questions to be attempted. Maximum length of answer can be upto 5 pages. Each question will carry 4.5 marks, total weightage being 9 marks.

Unit - I

Lipids: Classification of lipids and fatty acids. General structure and function of major lipid subclasses, acylglycerols, phosphoglycerides, Sphingolipids, glycosphingolipids and terpenes, sterols, steroids.

Unit -II

Proteins: Structure of amino acids, non-protein and rare amino acids and their chemical reactions. Structural organization of proteins (Primary, Secondary, Quaternary and domain structure, protein classification and function. Forces stabilizing Primary, Secondary and Tertiary.

Unit - III

Vitamins: Occurrence, Biomedical importance, Deficiency, of Fat soluble vitamins (A,D,E,K) and water soluble vitamins (Vitamin B complex and Vitamin C), vitamins as cofactor.

Unit - IV

Hormones: Secretory glands, Biomedical importance and disorders related with Steroid hormones (Ovarian, Testicular, Adrenal Cortical and Corpus luteal) and peptide hormones (Hormones of pancreas, hypophysis, parathyroid, GIT), Amino acid Hormones (Thyroidal, Adrenal medullary).

- 3. Sawhney, S.K. and Randhir singh (2001). Introductory Practical Biochemistry. Narosa Publishing House.

Physical Chemistry – A

Time: 3 Hrs. Max.Marks:32+08(Internal Assessment)

Periods: 3

Note for the paper setters/examiners:

Each question paper will consist of three sections as follows:

Section-A: 8 very short answer type questions are to be set, two from each unit, the

maximumlength of answer can be about 1/3 of a page. All questions are compulsory.

Each question will carry one mark, total weightage being 8 marks.

Section-B: This section will comprise of 8 questions, two from each unit. 5 questions to

beattempted and maximum length of answer can be upto two pages. Each question

will carry 3 marks, total weightage being 15 marks.

Section-C: This section will comprise of four essay type questions, one from each unit.

Twoquestions to be attempted. Maximum length of answer can be upto 5 pages.

Each question will carry 4.5 marks, total weightage being 9 marks.

Unit-I

Chemical Thermodynamics:

State of a system, state variables, thermodynamic equilibrium, thermodynamic properties, Intensive and Extensive properties, various types of processes. First Law of Thermodynamics, internal energy and enthaply, change in internal energy and change in enthalpy for expansion of real and ideal gases under isothermal and adiabatic conditions for reversible and irreversible processes. Relation between Cp and Cv. Internal energy change and enthaply change in a chemical process. Hess's law of heat summation. Enthaply of formation, enthaply of ionisation and calculation of bond dissociation energies from thermochemical data.

Unit-II

Second law of thermodynamics, entropy and Gibb's free energy, Carnot's cycle, Calculation of entropy change for reversible and irreversible processes under isothermal and non-isothermal conditions. Gibbs Hemholtz equation. Third law of thermodynamics, Nernst heat theorem, calculation of absolute entropies of substances. Meaning of chemical equilibrium, homogeneous and heterogeneous equilibria. Thermodynamic derivation of law of chemical equilibrium, Van't Hoff relation, Relation between free energy change and equilibrium constants KpKc and Kf. Temperature and pressure dependence of equilibrium constant.

Unit-III

Solutions:

Definition, types of solutions, Molarity, molality, normality, mole fraction, mass fraction, vapour pressure of solution and Raoult's law. Factors influencing the solubility of gas in liquids, Henry's law. Ideal solutions, DuhemMargules equation. Distillation of ideal solutions, Lever rule, vapour pressure of ideal solutions and non ideal solutions. Distillation of non ideal solutions. Azeotropes, colligative properties, lowering of vapour pressure, depression in freezing point, elevation in boiling point, osmotic pressure. Their common features and applications. Thermodynamic derivation of elevation in boiling point, depression in freezing point and osmotic pressure. Van't Hoff factor and its application to calculate degree of association and degree of dissociation.

Unit-IV

Phase Equilibria:

Definition of phase, component and degree of freedom, Phase rule and its thermodynamic derivation. Derivation of Clausius-Clapeyron equation and its importance in phase equilibria, phase diagrams of water system, KI water system and lead-silver system.

Physical Chemistry - A Practical

Time: 3 Hrs. Max. Marks: 16+04(Internal Assessment)

Periods: 4

Note. The question paper will be set by the examiner based on the syllabus.

- 1. Surface tension: Determination of surface tension of a given liquid by Stalgometer. Using number of drops and weight of drops methods
- 2. Determination of coefficient of viscosity of a pure liquid (Acetone, Ethanol, Propanol, Butanol, Glycol) (Effect of hydrogen bonding on viscosity)
- 3. Photometry.

Verification of Lambert beer's law for solution of CoCl₂H₂o (in water) and K₂Cr₂O₇ (in water)

- 4. a) pH of buffer solution
 - b) Acid base titration HCl vs. NaOH.
 - c) Determination of ionization constant of a weak acid (CH₃COOH)
- 5. Study of distribution law of Benzoic acid between benzene and water.
- 6. Study of distribution law by iodine distribution between water and CCl₄. Given standar solution Na₂S₂O₃.
- 7. Determine composition of HCl and CH₃COOH in the given solution pH metrically.

B.Sc. Biotechnology (Semester–III) BT - 2 Zoology–C

Theory: 32 Practical: 16

Internal Assessment: 12

Total Marks: 60

Theory

Time: 3 Hrs Maximum Marks: 32

Periods/week: 3

Note for the paper setters/examiners:

Each question paper will consist of three sections as follows:

Section-A: 8 very short answer type questions are to be set, two from each unit, the maximum length of answer can be about 1/3 of a page. All questions are compulsory. Each question will carry one mark, total weightage being 8 marks.

Section-B: This section will comprise of 8 questions, two from each unit. 5 questions to be attempted and maximum length of answer can be upto two pages. Each question will carry 3 marks, total weightage being 15 marks.

Section-C: This section will comprise of four essay type questions, one from each unit. Two questions to be attempted. Maximum length of answer can be upto 5 pages. Each question will carry 4.5 marks, total weightage being 9 marks.

Unit-I

Introduction to parasitology (pertaining to various terminologies in use). Brief account of Life history, mode of infection and pathogenicity of the following pathogens with reference to an, prophylaxis and treatment, Entamaeba, Trypanosoma, Leishmania, Giardia, Trichomonas and Plasmodium.

Unit-II

Histopathological changes in organs in relation to diseases such as livers, cirrhosis, nephrosis, tumors, cancer, AIDS.

Unit-III

Arthropod vectors of human diseases : Malaria, Yellow fever, Dengue haemorragic fever, Filariasis, Plague and Epidemic typhus. Distribution and control of the above mentioned vectors.

Unit-IV

General account of diseases such as AIDS, Hepatitis, typhoid and cholera, their occurence and eradication programmes. General account of drug therapy and drug resistance.

Books:

- 1. Chatterjee, K.D Parasitology (Protozoology and Helminthology)
- 2. Harrison A. (2000). Principles of Medicine

B.Sc. Biotechnology (Semester–III)

BT-2

Zoology - C Practical

Time: 3 Hrs. Max. Marks: 16

Period/week: 4

Note. The question paper will be set by the examiner based on the syllabus.

- 1. Preparation of blood smear showing different stages of plasmodium
- 2. Study of permanent slides and specimens of parasitic protozoans, helminth and arthropods:

Entamoeba, Giardia, Plasmodium, Trypanosoma, Leishmania, Trichomonas, Anopheles, Culex (mouth parts), lice, rat flea, Aedes aegypti, Tapeworm, Ascaris, Wuchereria, Trichinella, Ancylostoma, Oxyuris.

- 3. Pathological examination of blood and urine.
- 4. Blood Tests:
 - (a) Erythrocyte sedimentation rate
 - (b) Bleeding time
 - (c) Clotting time
 - (d) Prothrombin time

BT – 3 Biochemistry – III

Time: 3 Hrs. Theory: 32
Periods: 3
Int. assessment: 08
Total: 40

Note for the paper setters/examiners:

Each question paper will consist of three sections as follows:

Section-A: 8 very short answer type questions are to be set, two from each unit, the maximum length of answer can be about 1/3 of a page. All questions are compulsory. Each question will carry one mark, total weightage being 8 marks.

Section-B: This section will comprise of 8 questions, two from each unit. 5 questions to be attempted and maximum length of answer can be upto two pages. Each question will carry 3 marks, total weightage being 15 marks.

Section-C: This section will comprise of four essay type questions, one from each unit. Two questions to be attempted. Maximum length of answer can be upto 5 pages. Each question will carry 4.5 marks, total weightage being 9 marks.

UNIT-I

Metabolism: - Basic principles of metabolism, metabolic pathways, catabolism, anabolism, basic principles of bioenergetics, biological oxidation reduction reaction, energy rich metabolites.

UNIT-II

Carbohydrate metabolism: - Biosynthesis and degradation of carbohydrates, Glycolysis, gluconeogenesis, feeders pathways for glycolysis, regulation of carbohydrates metabolism.

UNIT-III

Kreb's cycle: - Amphibolic nature of kreb's cycle, regulation and enzymes of kreb's cycle, glyoxylate pathway.

UNIT-IV

Electron transport chain: - Mitochondrial electron chain, oxidative phosphorylation, chemiosmotic hypothesis, ATP synthase and regulation of ATP synthesis.

Internal Assessment: 12

Total Marks: 60

Theory

Time: 3 Hrs Maximum Marks: 32

Periods/week: 3

Note for the paper setters/examiners:

Each question paper will consist of three sections as follows:

Section-A: 8 very short answer type questions are to be set, two from each unit, the maximum length of answer can be about 1/3 of a page. All questions are compulsory. Each question will carry one mark, total weightage being 8 marks.

Section-B: This section will comprise of 8 questions, two from each unit. 5 questions to be attempted and maximum length of answer can be upto two pages. Each question will carry 3 marks, total weightage being 15 marks.

Section-C: This section will comprise of four essay type questions, one from each unit. Two questions to be attempted. Maximum length of answer can be upto 5 pages. Each question will carry 4.5 marks, total weightage being 9 marks.

Unit - I

Cell as a basic unit of living systems. The cell theory Broad Classification of Cell Types: PPLO's, bacteria, eukaryotic microbes, plant and animal cells. A detailed classification of cell types within an organism. Cell, tissue, organ and organism as different levels of organizations of otherwise genetically similar cells.

Unit - II

Ecological amplitude of cells in high altitude, sediments, arctic, hotspring, arid, brackish extremophytes and freshwater environments.

Unit – III

Extracellular Matrix: Composition, molecules that mediate cell adhesion, membrane receptors for extra cellular matrix, regulation of receptor expression and function. Signal transduction: General considerations of Cell-matrix and cell - cell interactions.

Unit-IV

Biological Membranes: Supramolecular architecture of membranes; Solute transport across membranes; Model membranes and Liposomes.

B.Sc. Biotechnology (Semester–III)

BT-4

Cell Biology - A Practical

Time: 3 Hrs. Max. Marks: 16 Periods/week: 4

Note. The question paper will be set by the examiner based on the syllabus.

I. Microscopy:

- (a) Principles of compound, phase contrast, electron microscopy.
- (b) Use and care of Light compound microscope.

II. Study of Cells:

- (a) Prokaryotic cells: Lactobacillus, E. coli. Blue green algae.
- (b) Eukaryotic cells: Testicular material (for studies of spermatogenesis)

III. Study of electron micrographs of various cell organelles-

Plasma membrane, Mitochondria, Golgi complex, Lysosomes, Endoplasmic Reticulum (smooth and granular), Cilia, Centrioles, inclusions like glycogen, lipids, etc.

- 1. Celis, J.E. (1998) Cell Biology: A Laboratory handbook. Vol. 1-3. Academic Press, UK.

Unit - I

Organization of Chromosomes: The structure of prokaryotic and eukaryotic chromosome, centromere and telomere structure, euchromatin and heterochromatin, Special chromosomes: Polytene chromosomes and Lampbrush chromosomes, satellite DNA, the supercoiling of DNA.

Unit - II

Mendel's Laws of Inheritance: Principle of segregation and Independent assortment, Mnohybrid, dihybrid and trihybrid crosses, Back cross and test cross.

Interaction of Genes: Incomplete inheritance and co-dominance, pleotropism, modification of **F2** ratios: epistasis, complementary genes, supplementary genes, inhibitory genes, duplicate genes, lethality and collaborators genes. Multiple allelism.

Unit - III

Linkage: Coupling and repulsion hypothesis, chromosomal theory of linkage, complete and incomplete linkage, linkage groups and significance of linkage.

Crossing Over: Introduction, mechanism of meiotic crossing over, types of crossing over, factors affecting it and its significance.

Unit – IV

Mutation: Spontaneous versus induced mutations, types of mutations, mutations rate and frequency, Mutagens: Physical and Chemical, the molecular basis of mutations. Significance & Practical applications of Mutation

Basic Microbial Genetics: Conjugation, transduction, transformation

B.Sc. BIOTECHNOLOGY (SEMESTER–III) BT-6 Genetics Practical

Time: 3 Hrs. Practical: 16
Periods: 4 Int. assessment: 04
Total: 20

Note: The question paper will be set by the examiner based on the syllabus.

- 1. Demonstration of Law of segregation and Independent assortment (use of coloured beads, capsules etc.).
- 2. Numerical problems on Mendelism and on modified F2 ratios.
- 3. Numerical problems on Paternity disputes (Blood groups)
- 4. Segregation demonstration in preserved material
- 5. Study of polytene chromosomes from permanent slides.
- 6. Testing of blood groups and Rh factors in human beings.
- 7. Dermatographics : Palm print taking and finger tip patterns.
- 8. Preparation and study of mitosis slides from onion root tips by squash method.

BT - 7

Agro and Industrial Applications of Microbes – A

Time: 3 Hrs. Theory: 32
Periods: 3
Int. assessment: 08
Total: 40

Note for the paper setters/examiners:

Each question paper will consist of three sections as follows:

- **Section-A:** 8 very short answer type questions are to be set, two from each unit, the maximum length of answer can be about 1/3 of a page. All questions are compulsory. Each question will carry one mark, total weightage being 8 marks.
- **Section-B:** This section will comprise of 8 questions, two from each unit. 5 questions to be attempted and maximum length of answer can be upto two pages. Each question will carry 3 marks, total weightage being 15 marks.
- **Section-C:** This section will comprise of four essay type questions, one from each unit. Two questions to be attempted. Maximum length of answer can be upto 5 pages. Each question will carry 4.5 marks, total weightage being 9 marks.

Unit-I

Intorduction:

Basic concept of agriculture as industry. Industrially important microbes, its screening, selection and identification.

Unit-II

Maintenance and preservation of industrially important microbial cultures. Differences between microbial industrial processes and chemical industrial processes.

Unit-III

Improvement of Industrial Microbes:

Improvement programme of industrial microbes, mutational programme of penicillin producing microorganisms, selection pressure in maintaining the hyper producing microbes, revertant back of higher yielding microbes into lower production, media formulation and process optimisation of industrial and agro industrial microbes.

Unit-IV

Nitrogen fixation, Rhizobium, Azospirillum, Azobacter, Anabena in nitrogen fixation, Agrobacterium,

BT-7 Agro and Industrial Applications of Microbes – A Practical

Time: 3 Hrs. Practical: 16
Periods: 4 Int. assessment: 04
Total: 20

Note: The question paper will be set by the examiner based on the syllabus.

- 1. Autoclaving.
- 2. Microbial cells counting by serial dilution techniques.
- 3. Microbial cell counting by pore plate techniques.
- 4. Measurement of bacterial size.
- 5. Metabolic Characterization (e.g. IMVIC test)
- 6. One Step Growth of Bacteriophage.
- 7. Alcoholic and Mixed–Acid Fermentation.

B.A./B.Sc. (Agri., Biotech., Food Sci., Comp. Sci., Eco., FD., IT., Med., Non Med.)/BBA/B.Com./BJMC

SEMESTER-III

ESL-221: ENVIRONMENTAL STUDIES-I (COMPULSORY)

Time: 3 Hrs. Max. Marks: 50 Theory Lectures: 1½ Hours/ Week Theory Marks: 40; Int ass.: 10

Section–A: (12 Marks): It will consist of five short answer type questions. Candidates will berequired to attempt three questions, each question carrying four marks. Answer to any of thequestions should not exceed two pages.

Section–B: (16 Marks): It will consist of four essay type questions. Candidates will be required to attempt two questions, each question carrying eight marks. Answer to any of the questions should not exceed four pages.

Section–C: (12 Marks): It will consist of two questions. Candidate will be required to attemptone question only. Answer to the question should not exceed 5 pages.

1. The Multidisciplinary Nature of Environmental Studies:

- Definition, scope & its importance.
- Need for public awareness.

2. Natural Resources:

- Natural resources and associated problems:
- **a) Forest Resources**: Use of over exploitation, deforestation, case studies. Timber extraction, Mining, dams and their effects on forests and tribal people.
- **b)** Water Resources: Use and over-utilization of surface and ground water, floods, drought, conflicts over water, dams-benefits and problems.
- c) Mineral Resources: Use and exploitation, environmental effects of extracting and using mineral resources, case studies.
- **d)** Food Resources: World food problems, change caused by agriculture and overgrazing, effects or modern agriculture, fertilizer-pesticide problem, salinity, case studies.
- **e**) **Energy Resources**: Growing of energy needs, renewable and non-renewable energy resources, use of alternate energy sources, case studies.

resources, use of alternate energy sources, case studies.
f) Land Recourses: Land as a resource, land degradation, soil erosion and desertification.
□ □ Role of an individual in conservation of natural resources.
☐ Equitable use of resources for sustainable lifestyles.
3. Ecosystem:
□ □ Concept of an ecosystem.
□ Structure and function of an ecosystem.
□ □ Producers, consumers and decomposers.
□ □ Energy flow in the ecosystem.
□ □ Ecological succession.
□ □ Food chains, food webs and ecological pyramids.
□ □ Introduction, types, characteristic features, structure and function of the following
ecosystems:

- a. Forest ecosystem
- b. Grassland ecosystem
- c. Desert ecosystem

d. Aquatic ecosystems (ponds, streams, takes, rivers, oceans, estuaries)
4. Social Issues and Environment:
□ □ From unsustainable to sustainable development.
□ □ Urban problems related to energy.
□ □ Water conservation, rain water harvesting, watershed management.
☐ Resettlement and rehabilitation of people; its problems and concerns. Case studies.
□ □ Environmental ethics: Issues and possible solutions.
□ □ Climate change, global warning, acid rain, ozone layer depletion, nuclear accidents and
holocause. Case studies.
□ □ Wasteland reclamation.
☐ ☐ Consumerism and waste products.
□ □ Environmental Protection Act:
Air (prevention and Control of Pollution) Act.
Water (prevention and Control of Pollution) Act.
Wildlife Protection Act.
Forest Conservation Act.
□ □ Issues involved in enforcement of environmental legislation.
□ □ Public awareness.

Aquatic acceptance (nande etraame lakes rivers accept estuaries)

5. National Service Scheme

- Introduction and Basic Concepts of NSS: History, philosophy, aims & objectives of NSS;
 Emblem, flag, motto, song, badge etc.; Organizational structure, roles and responsibilities of various NSS functionaries.
- Health, Hygiene & Sanitation: Definition, needs and scope of health education; Food and Nutrition; Safe drinking water, water borne diseases and sanitation (Swachh Bharat Abhiyan); National Health Programme; Reproductive health.

Physical Chemistry – B

Time: 3 Hrs. Max.Marks:32+08(Internal Assessment)

Periods: 3

Note for the paper setters/examiners:

Each question paper will consist of three sections as follows:

Section-A: 8 very short answer type questions are to be set, two from each unit, the maximumlength of answer can be about 1/3 of a page. All questions are compulsory. Each question will carry one mark, total weightage being 8 marks.

Section-B: This section will comprise of 8 questions, two from each unit. 5 questions to beattempted and maximum length of answer can be upto two pages. Each question will carry 3 marks, total weightage being 15 marks.

Section-C: This section will comprise of four essay type questions, one from each unit. Twoquestions to be attempted. Maximum length of answer can be upto 5 pages. Each question will carry 4.5 marks, total weightage being 9 marks.

Unit-I

Electrochemical Cells:

Electrode poential, Electromotive force (EMF).Reversible and irreversible cells, measurement of EMF of a cell.Nernst equation.Reference electrodes and other electrodes, standard electrode potential.Activity and activity coefficient determination from EMF results. Concentration cells with transference and without transference, liquid function potential, pH, glass electrode, quinone-hydroquinone electrode, Potentiometric titrations.

Unit-II

Chemical Kinetics:

Rate of reaction, rate constant, factors influencing rate of reaction, order, molecularity. Rate equations for Ist order, IInd order &IIIrd order reactions. Methods for determining order of reaction. Half Life, Activation energy and calculation from Arrhenius equation. Theories of reaction rates collision theory and transition state theory of biomolecular processes.

Unit-III

Catalysis:

Catalysis, acid base catalysis, enzyme catalysis including their mechanisms, MichaelisMenten equation for enzyme catalysis. Heterogeneous catalysis and its mechanism. Surface reactions with special reference to Unimolecular surface reactions.

Unit-IV

Ionic Equilibria and Conductance: Conductivity, equivalent and molar conductance. Variation of equivalent conductance with dilution of weak and strong electrolytes. Arrhenius and Debye Huckel theory. Kohlraush law of independent migration of ions. Transport number, factors effecting transport number, Ionicelocity, ionic mobility. Applications of conductance measurements. Determination of degree of ionisation of weak electrolyte, solubility, solubility product of sparingly soluble salts, ionic product of water, hydrolysis constant of a salt, conductometric titrations. Ionic strength. Salt hydrolysis, calculation of hydrolysis constant, Buffer solutions, Buffer index, Buffer capcity universal buffer preparation. Acid base indicators. Theory of acid base indicators. PH change and selection of indicators in different acid base titrations.

Physical Chemistry – B Practical

Time: 3 Hrs. Max. Marks: 16+04(Internal Assesment)

Periods: 4

Note. The question paper will be set by the examiner based on the syllabus.

- 1. Refractometry: Determine refractive index of a given liquid as a criterion for its purity. (Benzene i.e. commercial) benzene + A.R. acetone).
- 2. Polarimetry: Determine the %age composition of an optically active solution.
- 3. Calorimetry:
 - a) Determination of Heat of neutralization
 - (i) Strong acid-strong base
 - (ii) Weak acid-strong base.
 - b) Determination of Heat of solution of KCl, NH₄Cl, KNO₃
- 4. Conductometry:
 - a) Determination of cell constant.
 - b) Determination of specific and equivalent conductance of electrolyte (NaCl andHCl).
 - c) Precipitation titration of Na₂SO₄ vs. BaCl₂.
 - d) Neutralization titrations NaOH vs. HCl and NaOH vs. CH3COOH.
- 5. Determination of adsorption isotherm of oxalic acid on charcoal.

BT-2 (**Botany** – **C**)

Time: 3 Hours Max. Marks: 40 Credit Hrs.: 3/Week Theory: 32; Int. Ass.: 08

Note for the paper setters/examiners:

Each question paper will consist of three sections as follows:

Section-A: Very short answer type 8 questions are to be set, two from each unit, the maximumlength of answer can be about 1/3 of a page. All questions are compulsory. Each question will carry one mark, total weightage being 8 marks.

Section-B: This section will comprise of 8 questions, two from each unit. 5 questions to be attempted and maximum length of answer can be upto two pages. Each question will carry 3 marks, total weightage being 15 marks.

Section-C: This section will comprise of four essay type questions, one from each unit. Twoquestions to be attempted. Maximum length of answer can be upto 5 pages. Each question will carry 4.5 marks, total weightage being 12 marks.

Unit-I

Water relations, osmosis, transpiration, water potential, its components, physiological & molecular adaptations in plants with respect to cold, heat, drought and salt stress.

Unit-II

Heat shock proteins, dehydrins, late embryogenesis abundant proteins, role of different osmolytes in stress tolerance.

Unit-III

Plant Pathology & epidemiology: Definition, classification, mode of transmission & control measures of plant diseases. Disease resistance host pathogen interaction. Phytoalexins, PR proteins.

Unit-IV

A detailed account of the following plant diseases with respect to causal agents, symptoms, epidemology, disease cycle & their control measures. Black stem rust of wheat, Loose smut of wheat, Late and early blight of potato, False smut of rice, Bacterial blight of rice, Red rot of sugarcane, TMV of potato, Yellow vein mosaic of bhindi, Bunchy top of banana, Downy mildew of Bajra.

Botany- (Practical) BT-2 (Botany - C)

Time: 3 Hours Max. Marks: 20 Credit Hrs.: 4/Week Practical: 16; Int. Ass.: 04

Note. The question paper will be set by the examiner based on the syllabus.

- 1. Estimation of relative water content of leaf.
- 2. Measurement of osmotic potential of different tissues by Chardokov method.
- 3. Study of Plant pathogens
 - (a) Symptoms of the diseases
 - (b) Morbid anatomy of the plants infected with following diseases.

Black stem rust of wheat, Loose smut of wheat, Late and early blight of potato, False smut of rice, Bacterial blight of rice, Red rot of sugarcane, TMV of potato, Yellow vein mosaic of bhindi, Bunchy top of banana, Downy mildew of bajra.

BT – 3 Biochemistry – IV

Time: 3 Hrs. Theory: 32
Periods: 3
Int. assessment: 08
Total: 40

Note for the paper setters/examiners:

Each question paper will consist of three sections as follows:

Section-A: 8 very short answer type questions are to be set, two from each unit, the maximum length of answer can be about 1/3 of a page. All questions are compulsory. Each question will carry one mark, total weightage being 8 marks.

Section-B: This section will comprise of 8 questions, two from each unit. 5 questions to be attempted and maximum length of answer can be upto two pages. Each question will carry 3 marks, total weightage being 15 marks.

Section-C: This section will comprise of four essay type questions, one from each unit. Two questions to be attempted. Maximum length of answer can be upto 5 pages. Each question will carry 4.5 marks, total weightage being 9 marks.

UNIT-I

Lipid Catabolism: Oxidation of fatty acids, degradation of triacylglycerol, phosphoglycerides, sphingolipids, regulation of lipid metabolism.

UNIT-II

Lipid Anabolism: Synthesis of fatty acids, triacylglycerol, phosphoglycerides, sphingolipids, cholesterol.

UNIT-III

Amino Acid Metabolism: Transamination reactions of amino acids, urea cycle, biosynthesis and degradation of essential amino acids, regulation of amino acid biosynthesis.

UNIT-IV

Nucleic Acid Metabolism: Biosynthesis of purines and pyrimidines nucleotides, regulation of nucleotide biosynthesis. Degradation of purines and pyrimidines, nucleotides, salvage pathway.

BT-3 Biochemistry – IV Practical

Time: 3 Hrs. Practical: 16
Periods: 4 Int. assessment: 04
Total: 20

Note: The question paper will be set by the examiner based on the syllabus.

- 1. Quantitative estimation of amino acids using the ninhydrin reaction.
- 2. Purification of protein using salt precipitation.
- 3. Isolation of Casein from milk.
- 4. UV absorption of proteins and amino acids.
- 5. Chromatographic methods for separation of macromolecules
 - · Paper chromatography

B.Sc. Biotechnology (Semester–IV) BT - 4 Cell Biology – B

Theory: 32

Practical: 16

Internal Assessment: 12

Total Marks: 60

Theory

Time: 3 Hrs Maximum Marks: 32

Periods/week: 3

Note for the paper setters/examiners:

Each question paper will consist of three sections as follows:

Section-A: 8 very short answer type questions are to be set, two from each unit, the maximum length of answer can be about 1/3 of a page. All questions are compulsory. Each question will carry one mark, total weightage being 8 marks.

Section-B: This section will comprise of 8 questions, two from each unit. 5 questions to be attempted and maximum length of answer can be upto two pages. Each question will carry 3 marks, total weightage being 15 marks.

Section-C: This section will comprise of four essay type questions, one from each unit. Two questions to be attempted. Maximum length of answer can be upto 5 pages. Each question will carry 4.5 marks, total weightage being 9 marks.

Unit - I

Structure and function of cell organelles, ultrastructure of cell membrane, cytosol, Golgi bodies, endoplasmic reticulum (rough and smooth), ribosomes, cytoskeletal structures (actin, microtubules etc.),

Unit-II

Mitochondria, chloroplasts, lysosomes, peroxysomes, nucleus (nuclear membrane, nucleoplasm, nucleolus, chromatin).

Unit - III

Cell Division and Cell Cycle: mitosis, meiosis, stages of cell cycle, binary fission, amitosis and its regulation. Cell-cell interaction Cell locomotion (amoeboid, flagellar and ciliar).

Unit – IV

Cell Senescence and Death: Apoptosis and necrosis

Cell Differentiation in Plants and Animals: Totipotent, multipotent, pleuripotent cell.

Precellular Evolution: artificial creation of "cells"

B.Sc. Biotechnology (Semester–IV)

BT-4

Cell Biology – B Practical

Time: 3 Hrs. Max. Marks: 16 Periods/week: 4

1. Microtomy:

Introduction of the instrument- its use, care, section cutting and stretching.

2. Preparation of Permanent Slides:

Principles and procedures- Section cutting of tissues and staining of tissues with Haematoxylin/eosin method.

3. Study of permanent slides of various tissues:

Gut region, liver, lung, spleen, kidney, pancreas, testis, ovary, tongue, skin etc.

BT - 5

Immunotechnology

Time: 3 Hrs. Theory: 32
Periods: 3
Int. assessment: 08
Total: 40

Note for the paper setters/examiners:

Each question paper will consist of three sections as follows:

- **Section-A:** 8 very short answer type questions are to be set, two from each unit, the maximum length of answer can be about 1/3 of a page. All questions are compulsory. Each question will carry one mark, total weightage being 8 marks.
- **Section-B:** This section will comprise of 8 questions, two from each unit. 5 questions to be attempted and maximum length of answer can be upto two pages. Each question will carry 3 marks, total weightage being 15 marks.
- **Section-C:** This section will comprise of four essay type questions, one from each unit. Two questions to be attempted. Maximum length of answer can be upto 5 pages. Each question will carry 4.5 marks, total weightage being 9 marks.

Unit-I

Cell Mediated Immunity:

T-cell subsets and surface markers, T-dependent and T-independent antigens, recognition of antigens by T-cells.

UNIT-II

Immunodiagnostic Procedures:

Various types of immunodiffusion and immunoelectrophoretic procedures. Immunoblot, ELISA, RIA, Agglutination of pathogenic bacteria, Haemagglutination and haemagglutination inhibition.

Unit-III

Immunity to viruses, intracellular and extracellular bacteria, immunopathological consequences of parastitic infections, immune invasion, mechanism used by parasites, regulation of immune invasion, mechanism used by parasites.

Unit-IV

Active and passive immunization, Adjuvants, whole organism vaccine, purified macromolecules as vaccine.

Unit - I

Molecular basis of life. Structure of DNA. DNA replication both prokaryotes and eukaryotes.

Unit - II

DNA recombination molecular mechanisms: prokaryotic and eukaryotic. Insertion elements and transposons.

Unit-III

Structure of prokaryotic genes. Prokaryotic transcription. Prokaryotic translation. Prokaryotic gene expression (lac, his, trp, catabolic repression).

Unit - IV

Structure of eukaryotic genes. Eukaryotic transcription. Eukaryotic translation. Eukaryotic gene expression, transcription factors etc. Post translational regulation of gene expression.

Unit-I

Industrial and Agro-industrial Microbes:

Microbes involved in antibiotics, pharmaceutical drugs, enzymes production, solvent production, surfactants, aq. culture, vermiculture, composting, herbicides and biopesticides production,

Unit-II

Biotransformation, organic acids production, vitamins, aminoacids, single cell protein, biofertilizers, alcohols, wine, beers, mycotoxins.

Unit-III

Microbial Processes in Agrobiotechnology:

Introduction, plant microbe interactions, BT gene in BT cotton, Spirulina production, soil treatment with microbes, Mycorrhizal fungi, microbial pesticides, mycoherbicides.

Unit-IV

Microbial Process in Industrial Biotechnology:

Introduction, primary and secondary metabolites production, production of vitamins B_{12} , alcohols, wine, beer, cheese, bread, citric acid, penicillins, glutamic acid, cellulases, proteases in leather industries, Biochips.

BT-7

Agro and Industrial Applications of Microbes – B Pr actical

Time: 3 Hrs. Practical: 16
Periods: 4 Int. assessment: 04
Total: 20

Note: The question paper will be set by the examiner based on the syllabus.

- 1. Screening of cellulase producing microorganism from wood degrading soil.
- 2. Antibiotic sensitivity of the above microorganism.
- 3. Minimum inhibitory concentration of a antibiotics for the above microorganism.
- 4. Additive and synergistic effect of two drugs on the above microorganism.
- 5. Plating the milk samples for microbial contamination.
- 6. MBRT Test for determination of milk quality.

BT - 8 Enzymology

Time: 3 Hrs. Theory: 32
Periods: 3
Int. assessment: 08
Total: 40

Note for the paper setters/examiners:

Each question paper will consist of three sections as follows:

Section-A: 8 very short answer type questions are to be set, two from each unit, the maximum length of answer can be about 1/3 of a page. All questions are compulsory. Each question will carry one mark, total weightage being 8 marks.

Section-B: This section will comprise of 8 questions, two from each unit. 5 questions to be attempted and maximum length of answer can be upto two pages. Each question will carry 3 marks, total weightage being 15 marks.

Section-C: This section will comprise of four essay type questions, one from each unit. Two questions to be attempted. Maximum length of answer can be upto 5 pages. Each question will carry 4.5 marks, total weightage being 9 marks.

Unit I

Introduction to Enzymes: Nomenclature, Classification and Characteristics of enzymes, Enzyme specificity, Cofactors, Co-enzyme and Prosthetic group

Unit II

Mechanism of Enzyme Action: Nature of active site, identification of functional groups at active site, enzyme substrate complex, Factors responsible for catalytic efficiency of enzymes. Covalent catalysis, Acid base catalysis, Strain and distortion theory, Induced fit hypothesis.

Unit-III

Enzyme Kinetics:

A brief concept of bioenergetics and kinetics, Kinetics of single and bi-substrate enzyme catalyzed reactions, Michaelis Menten equation. Derivation of Michaelis Menten equation and determination of Km and Vmax values, Lineweaver-Burk plot, Hanes Plot and

Unit-IV

Enzyme inhibition: reversible and irreversible inhibition, Kinetics of competitive, uncompetitive and non-competitive inhibition. Effect of pH and temperature on rate of enzyme catalyzed reactions. Reversible covalent modification and zymogen activation, Isozymes and their importance

B.Sc. (BIO-TECHNOLOGY) (SEMESTER–IV) BT-8 Enzymology Practical

Time: 3 Hrs. Practical: 16
Periods: 4 Int. assessment: 04
Total: 20

Note: The question paper will be set by the examiner based on the syllabus.

- 1. Estimation of \Box -amylase activity from saliva.
- 2. Assay of acid phosphatase activity.
- 3. Effect of temperature on enzyme activity.
- 4. Effect of pH on enzyme activity
- 5. Determination of Km for acid phosphatase.

- 1. Plummer D.T. (1998). An Introduction of Practical Biochemistry, 3rd Ed. Tata McGraw Hill Publishers Co. Ltd., New Delhi.
- 2. Bansal, D.D., Khardori, R. & Gupta, M.M. (1985). Practical Biochemistry. Standard Publication, Chandigarh.
- 3. Sawhney, S.K. and Randhir Singh (2001). Introductory Practical Biochemistry. Narosa Publishing House, New Delhi.

B.A./B.Sc. (Agri., Biotech., Food Sci., Comp. Sci., Eco., FD., IT., Med., Non Med.)/BBA/B.Com./BJMC

SEMESTER-IV

ESL-222: ENVIRONMENTAL STUDIES-II (COMPULSORY)

Time: 3 Hrs. Max. Marks: 50 Theory Lectures: 1½ Hours/ Week Theory Marks: 40; Int ass.: 10

Section–A: (12 Marks): It will consist of five short answer type questions. Candidates will berequired to attempt three questions, each question carrying four marks. Answer to any of thequestions should not exceed two pages.

Section–B: (16 Marks): It will consist of four essay type questions. Candidates will be required to attempt two questions, each question carrying eight marks. Answer to any of the questions should not exceed four pages.

Section–C: (12 Marks): It will consist of two questions. Candidate will be required to attemptone question only. Answer to the question should not exceed 5 pages.

1. Biodiversity and its Conservation:

- Definition: Genetic, species and ecosystem diversity.
- Biogeographical classification of India.
- Value of Biodiversity: Consumptive use; productive use, social, ethical, aesthetic and option
- values.
- Biodiversity of global, National and local levels.
- India as mega-diversity nation.
- Hot-spots of biodiversity.
- Threats to Biodiversity: Habitat loss, poaching of wild life, man wildlife conflicts.
- Endangered and endemic species of India.
- Conservation of Biodiversity: In situ and Ex-situ conservation of biodiversity.

2. Environmental Pollution: ☐ Definition, causes, effects and control measures of: a) Air Pollution b) Water Pollution c) Soil Pollution d) Marine Pollution e) Noise Pollution f) Thermal Pollution g) Nuclear Hazards h) Electronic Waste □ Solid Waste Management: Causes, effects and control measures of urban and industrial \square Role of an individual in prevention of pollution. □ □ Pollution case studies. □ □ Disaster Management: Floods, Earthquake, Cyclone and Landslides. 3. Human Population and the Environment □ Population growth, variation among nations. ☐ Population explosion-Family welfare programme.

☐ Environment and human health.

□ □ Human rights.
□ □ Value education.
\Box \Box HIV/AIDS.
□ □ Women and child welfare.
$\square \square$ Role of information technology in environment and human health.
□ □ Case studies.
□ Road Safety Rules & Regulations: Use of Safety Devices while Driving, Do's and Don'ts
while Driving, Role of Citizens or Public Participation, Responsibilities of Public under
Motor Vehicle Act, 1988, General Traffic Signs.
□ □ Accident & First Aid: First Aid to Road Accident Victims, Calling Patrolling Police &
Ambulance.

4. National Service Scheme:

- **Entrepreneurship Development:** Definition & Meaning; Qualities of good entrepreneur; Steps/ ways in opening an enterprise; Role of financial and support service Institutions.
- **Civil/Self Defense:** Civil defense services, aims and objectives of civil defense; Needs for self-defense training.

5. Field Visits:

- Visit to a local area to document environmental assets–river/forest/grassland/hill/mountain.
- Visit to a local polluted site–Urban/Rural/Industrial/Agricultural.
- Study of common plants, insects, birds.
- Study of simple ecosystems–pond, river, hill slopes etc.
- Contribution of the student to NSS/any other social cause for service of society.

Note: In this section the students will be required to visit and write on the environment of an area/ ecosystem/vi1lage industry/disaster/mine/dam/agriculture field/waste management/hospital etc. with its salient features, limitations, their implications and suggestion for improvement.

BT-1 rDNA Technology A

Time: 3 Hrs. Theory: 32
Periods: 3
Int. assessment: 08
Total: 40

Note for the paper setters/examiners:

Each question paper will consist of three sections as follows:

Section-A: 8 very short answer type questions are to be set, two from each unit, the maximum length of answer can be about 1/3 of a page. All questions are compulsory. Each question will carry one mark, total weightage being 8 marks.

Section-B: This section will comprise of 8 questions, two from each unit. 5 questions to be attempted and maximum length of answer can be upto two pages. Each question will carry 3 marks, total weightage being 15 marks.

Section-C: This section will comprise of four essay type questions, one from each unit. Two questions to be attempted. Maximum length of answer can be upto 5 pages. Each question will carry 4.5 marks, total weightage being 9 marks.

UNIT I

DNA Modifying enzymes: Ligases for blunt & sticky end ligation, DNA Polymerases, Klenow fragment, Alkaline phosphatase, Antarctic phosphatase, Polynucleotide kinase, Terminal deoxynucleotidyl transferase, Restriction enzymes, reverse transcriptase. RNase-H, DNase-I, Nuclease S-I

UNIT II

Cloning Vectors for E.coli: features of plasmids and development of plasmids as vector (α -complementation), lytic & lysogenic cycle in Lambda: bacteriophages as vector, Genetic selection (Hfl, Spi) and histochemical selection, genome composition of M13, Cosmids, Phagemids, fosmids.

UNIT III

Southern & Northern blotting, Hybridization, Merits and demerits of nitrocellulose and nylon membranes (N & N+). Methods of Transformation: CaCl₂, electroporation, transfection, micro projectile.

UNIT IV

Labelling of DNA and RNA- Radioactive labelling (Nick Translation, Random Priming, End Labelling), Non-Radioactive labelling (Direct & Indirect non isotopic labeling), Detection systems of labeled probes

rDNA Technology (Practical)

Time: 3 Hrs. Practical: 16
Periods: 4 Int. assessment: 04
Total: 20

Note: The question paper will be set by the examiner based on the syllabus.

- 1. Growing of E.coli bacterial culture.
- 2. Isolation of genomic DNA from bacteria.
- 3. Spectrophotometric quantification of DNA and determination of purity.
- 4. Agarose Gel Electrophoresis.
- 5. Restriction enzyme digestion of the isolated DNA with 6, 5 and 4 cutters.
- 6. Agarose Gel Electrophoresis of the digested fragments.

- 1. S.B. Primrose and R.M. Twyman; Principles of Gene Manipulation. 2006.
- 2. J. Sambrook and Michael R. Green; Molecular Cloning: A Laboratory Manual, (Fourth Edition), CSHL, 2012.
- 3. Brown TA, Genomes, 3rd ed. Garland Science 2006

BT-2 Concepts of Plant Tissue Culture

Time: 3 Hrs. Theory: 32
Periods: 3
Int. assessment: 08
Total: 40

Note for the paper setters/examiners:

Each question paper will consist of three sections as follows:

- **Section-A:** 8 very short answer type questions are to be set, two from each unit, the maximum length of answer can be about 1/3 of a page. All questions are compulsory. Each question will carry one mark, total weightage being 8 marks.
- **Section-B:** This section will comprise of 8 questions, two from each unit. 5 questions to be attempted and maximum length of answer can be upto two pages. Each question will carry 3 marks, total weightage being 15 marks.
- **Section-C:** This section will comprise of four essay type questions, one from each unit. Two questions to be attempted. Maximum length of answer can be upto 5 pages. Each question will carry 4.5 marks, total weightage being 9 marks.

Unit-I

Plant nutrition, macronutrients and micronutrients and their deficiency symptoms; Plant tissue culture media: types, components and their role.

Unit-II

Physiological functions and biosynthesis of major plant growth regulators such as auxins, cytokinins, gibberllins and abscisic acid.

Unit-III

Totipotency, factors affecting cellular totipotency, Cell differentiation, Dedifferentiation and redifferentiation of cells; tissue competency, plant-explant-plant concept. Factors influencing plant tissue culture: Genotypic, physiological, biochemical and other extrinsic factors.

Unit IV

Introduction to Methods of gene transfer - Direct (Biolistics) and indirect (agrobacterium mediated gene transfer)

Books:

- 1. Taiz, L. and Zeiger, E. (2002) Plant Physiology, 3rd Edition, Publisher: Sinauer Associates; 3rd edition (Aug. 30, 2002)
- 2. Razdan, M.K. (2003) Introduction to Plant tissue culture, Science Publishers
- 3. Bhojwani, S.S. and Razdan, M.K. (1996). Plant Tissue Culture. Theory and Practice, Elsevier.
- 4. Smith, R.H. (2000) Plant tissue culture: techniques and experiments, Gulf professional publishing

Concepts of Plant Tissue Culture (Practical)

Time: 3 Hrs. Practical: 16
Periods: 4 Int. assessment: 04
Total: 20

Note: The question paper will be set by the examiner based on the syllabus.

- 1. To study functions and operations of various instruments required for plant tissue culture (pH meter, autoclave, laminar air-flow, incubators, oven, distillation unit etc).
- 2. Laboratory design set up for a PTC Laboratory.
- 3. Cleaning of glassware, plasticware and contaminated cultures.
- 4. Different types of enclosure used in plant tissue culture. Preparation of cotton plugs.
- 5. Preparation of stock solutions of Murashige & Skoog (1962) medium.
- 6. Preparation of Murashige & Skoog's medium from stock solutions.
- 7. Different sterilization process (Instruments, glassware and thermolabile and thermostable components)
- 8. Selection, preparation, sterilization and inoculation of explants.

BT-3 Animal Tissue Culture

Time: 3 Hrs.

Periods: 3

Int. assessment: 08

Total : 40

Note for the paper setters/examiners:

Each question paper will consist of three sections as follows:

Section-A: 8 very short answer type questions are to be set, two from each unit, the maximum length of answer can be about 1/3 of a page. All questions are compulsory. Each question will carry one mark, total weightage being 8 marks.

Section-B: This section will comprise of 8 questions, two from each unit. 5 questions to be attempted and maximum length of answer can be upto two pages. Each question will carry 3 marks, total weightage being 15 marks.

Section-C: This section will comprise of four essay type questions, one from each unit. Two questions to be attempted. Maximum length of answer can be upto 5 pages. Each question will carry 4.5 marks, total weightage being 9 marks.

Unit-I

Historical background, Advantages & Disadvantages of animal tissue culture, Design and layout of ATC Lab, Equipments used in ATC Lab, Aseptic Techniques in ATC- Sterilization of culture media, glassware & tissue culture laboratory. Growth and viability of cells in culture, cryopreservation and retrieval of cells from frozen storage, transportation of cells. Characteristics of normal and transformed cells.

Unit- II

Contamination- sources, Types, monitoring and eradication of contamination, Cross Contamination. Safety considerations in ATC laboratory, Clean Environment – P1, P2, P3 facility and their applications.

Unit-III

Culture Media and Reagents-Types of cell culture media, physiochemical properties, balanced salt solution, constituents of serum, serum free media (SFM), design of SFM, Advantages and disadvantages of serum supplemented and serum free media, conditioned media

Unit-IV

Primary culture and Established cell line Culture (Finite & continuous cell lines), Isolation of cells-Enzyme digestion, perfusion and mechanical disaggregation. Culture of attached cells and cells in suspension, phases of cell growth and determination of cell growth data (calculation of *in vitro* age, multiplication rate, population doubling time, cell counting, phases of cell cycle)

- 1. Gareth, E.J. (1996), Human Cell Culture Protocols, Humara Press.
- 2. Butler, M. (1996), The Animal Cell Culture and Technology, IRL Oxford Univ. Press.
- 3. Julio, E., Celis (1998), Cell Biology-A laboratory hand book, Vol. I-IV, 2nd ed., Academic Press, New York.
- 4. Freshney, R, T. (2006), Culture of Animal Cells 5th ed., John Wiley and Sons, New York

Animal Tissue Culture (Practical)

Time: 3 Hrs. Practical: 16
Periods: 4 Int. assessment: 04
Total: 20

Note: The question paper will be set by the examiner based on the syllabus.

- 1. Sterilization techniques: Theory and Practical
- -Glass ware sterilization
- -Media sterilization -

Laboratory Sterilization

- 2. Sources of contamination and decontamination measures.
- 3. Preparation of Hanks Balanced salt solution
- 4. Preparation of Minimal Essential Growth medium.
- 5. Isolation of lymphocytes for culturing
- 6. Isolation of rat macrophages from peritoneum for culturing

Book Recommended:

1. Freshney, R.T. (2006), Culture of Animal Cells. 5th ed., John Wiley and Sons, New Delhi.

BT-4 PATENT LAWS IN BIOTECHNOLOGY

Time: 3 Hrs.

Periods: 3

Int. assessment: 08

Total : 40

Note for the paper setters/examiners:

Each question paper will consist of three sections as follows:

Section-A: 8 very short answer type questions are to be set, two from each unit, the maximum length of answer can be about 1/3 of a page. All questions are compulsory. Each question will carry one mark, total weightage being 8 marks.

Section-B: This section will comprise of 8 questions, two from each unit. 5 questions to be attempted and maximum length of answer can be upto two pages. Each question will carry 3 marks, total weightage being 15 marks.

Section-C: This section will comprise of four essay type questions, one from each unit. Two questions to be attempted. Maximum length of answer can be upto 5 pages. Each question will carry 4.5 marks, total weightage being 9 marks.

Unit-I

Introduction to Patent law. First Indian Patent Law and Amendments, History of Indian Patent System, Patentable and Non Patentable Inventions in India, Requirements and objectives of Patent, Patentable subject matter. Procedure for obtaining patent and patenting agencies in India.

Unit-II

Writing a patent, Formats of application and background information, Provisional and Complete Specifications, Types of patent applications, Life of a Patent, Rights of Patentee, Post Grant Opposition, Infringement of Patent, Patent Cooperation Treaty, Patent Offices in India, Sources of Patent Information, Patent literature search.

Unit - III

Patenting in Biotechnology, economic and depository considerations, TRIPs articles relevant to Biotechnology Sector, Patenting Genes, Gene fragments, SNPs, Proteins and Stem cells, Patents related to Bacteria, Virus, Fungi and medicinal plants.

Unit IV

Ethical issues in Biotechnology, Types of risk associated with release of genetically modified microorganisms, Ecological impact, Biosafety, environmental and agricultural concerns, Ethics of Human cloning, reproduction and stem cell research, Legal aspects of patenting

Books:

- 1. Singh, I. and Kaur, B (2010) Patent law and Entrepreneurship, 3rd Edition, Kalyani Publishers
- 2. Singh, B.D. (2004). Biotechnology expanding horizons, Kalyani Publishers, New Delhi.

BT-5 BIOPROCESS ENGINEERING – A

Time: 3 Hrs.

Periods: 3

Int. assessment: 08

Total : 40

Note for the paper setters/examiners:

Each question paper will consist of three sections as follows:

Section-A: 8 very short answer type questions are to be set, two from each unit, the maximum length of answer can be about 1/3 of a page. All questions are compulsory. Each question will carry one mark, total weightage being 8 marks.

Section-B: This section will comprise of 8 questions, two from each unit. 5 questions to be attempted and maximum length of answer can be upto two pages. Each question will carry 3 marks, total weightage being 15 marks.

Section-C: This section will comprise of four essay type questions, one from each unit. Two questions to be attempted. Maximum length of answer can be upto 5 pages. Each question will carry 4.5 marks, total weightage being 9 marks.

Unit-1

Introduction: Fundamental principles of Chemical Engineering and biochemical engineering. Fourier's Laws of heat transfer, Moleular diffusion, Diffusion theory, role of diffusion in bioprocessing, Oxygen transfer methodology in bioreactors and factors affecting oxygen transfer, Types of microbial culture: Batch, Fed batch and continuous culture

Unit-II

Microbial Growth Kinetics:

Simple kinetics of microbial growth, yield coefficient, doubling time, specific growth rate, substrate inhibition kinetics, product inhibition kinetics, metabolic and biomass productivities.

Unit-III

Internal & external feed back systems, effector molecules and its kinetics, Effect of temperature, pH and inducer on product synthesis.

Unit-IV

Sterilization:

Introduction, air and media sterilizations, design of batch sterilization process, Del factor, sterilization cycle, continuous sterilization process, sterilization of fermenters.

BIOPROCESS ENGINEERING – A (Practical)

Time: 3 Hrs. Practical: 16
Periods: 4 Int. assessment: 04
Total: 20

Note: The question paper will be set by the examiner based on the syllabus.

- 1. To study the growth curve of microorganism.
- 2. To determine the specific growth rate and generation time of a bacterium during submerged fermentation.
- 3. Demonstration of sterilization of fermenter and other accessories.
- 4. To study the effect of temperature, pH and aeration on growth of microbes.
- 5. Production of an enzyme in a Bioreactor/shaking flask.

Reference Books:

- 1. Cappuccino J.G., Sherman N. (2007). Microbiology: A laboratory (Pearson Benjamin Cummings).

BT-6 Biophysical and Biochemical Techniques-A

Time: 3 Hrs. Theory: 32
Periods: 3
Int. assessment: 08
Total: 40

Note for the paper setters/examiners:

Each question paper will consist of three sections as follows:

Section-A: 8 very short answer type questions are to be set, two from each unit, the maximum length of answer can be about 1/3 of a page. All questions are compulsory. Each question will carry one mark, total weightage being 8 marks.

Section-B: This section will comprise of 8 questions, two from each unit. 5 questions to be attempted and maximum length of answer can be upto two pages. Each question will carry 3 marks, total weightage being 15 marks.

Section-C: This section will comprise of four essay type questions, one from each unit. Two questions to be attempted. Maximum length of answer can be upto 5 pages. Each question will carry 4.5 marks, total weightage being 9 marks.

Unit-I

Centrifugation: Basic principles of sedimentation, theory and applications of preparative and analytical centrifugation, Differential and density gradient centrifugation, Types of centrifugation machines and rotors, Sedimentation co-efficient, Factors affecting sedimentation coefficient, care of rotors.

Unit - II

Chromatography: Partition Coefficient, Theory and Principle of Paper and column chromatography, Two dimensional chromatography, gel exclusion chromatography, Principle and applications of paper, thin layer, ion-exchange and affinity chromatography.

Unit III

Gas Liquid Chromatography, High Performance Liquid chromatography, Fast Protein Liquid chromatography.

Unit IV

Spectroscopy: Basic Principle, Lambert Beer's law, Absorption spectrum, theory & principles of single and double beam UV/Visible spectroscopy, Basic Principle and instrumentation of NMR and ESR

Books:

- 1) Upadhyay, A., Upadhyay, K. and Nath N. (2005) Biophysical chemistry: Principles and Techniques. Himalaya Publishing House, India.
- 2) Wilson K. and Walker J. (Eds.) (1995). Practical Biochemistry: Principles and Techniques, Cambridge University Press, U.K.
- 3) Sheehan, D. (2000). Physical Biochemistry: Principles and Applications, John Wiley and Sons Ltd., Chichester, England.
- 4) Freifelder, D. (1982). Physical Biochemistry. Applications to Biochemistry & Molecular Biology, W.H. Freeman & Co.

Biophysical and Biochemical Techniques (Practical)

Time: 3 Hrs. Max. Marks: 16+04(Internal Assessment)

Periods: 4

Note: The question paper will be set by the examiner based on the syllabus.

- 1. To study sedimentation using Swing Out Rotor and Angle Rotor.
- 2. To study separation of bio-molecules by paper chromatography.
- 3. To study separation of bio-molecules by thin layer chromatography.
- 4. Separation of proteins by ion-exchange column chromatography
- 5. Separation of proteins by affinity column chromatography.

Physical, Organic & Inorganic Aspects of Spectroscopy-A

Time: 3 Hrs. Max.Marks:32+08(Internal Assessment)

Periods: 3

Note for the paper setters/examiners:

Each question paper will consist of three sections as follows:

Section-A: 8 very short answer type questions are to be set, two from each unit, the maximumlength of answer can be about 1/3 of a page. All questions are compulsory. Each question will carry one mark, total weightage being 8 marks.

Section-B: This section will comprise of 8 questions, two from each unit. 5 questions to beattempted and maximum length of answer can be upto two pages. Each question will carry 3 marks, total weightage being 15 marks.

Section-C: This section will comprise of four essay type questions, one from each unit. Twoquestions to be attempted. Maximum length of answer can be upto 5 pages. Each question will carry 4.5 marks, total weightage being 9 marks.

UNIT - I

1. Energy and Electromagnetic Spectrum

Introduction, electromagnetic spectrum and Units, regions of the spectrum, basic features of different spectrometers, statement of Born-Oppenheimer approximation, degree of freedom, Frank Condon Principle, Fluorescence and Phosphorescence.

UNIT - II

II. Ultraviolet and Visible Spectroscopy

The energy of electronic excitation, measurement techniques, Beer-Lambert Law, Molar extinction coefficient. Different types of transition noticed in UV spectrum of organic functional groups and their relative energies. Chromophore, auxochromes, Absorption and intensity shifts, Transition probability. Factors affecting λ_{max} Effect of steric hindrance to coplanarity, Solvent Effects.

UNIT - III

III. Infrared Spectroscopy

Vibrational Energy Levels, Selection Rules, Force Constant, Fundamental Vibration Frequencies, Factors influencing Vibrational Frequencies (Vibrational Coupling, Hydrogen Bonding, Electronic effect, Bond Angles, Field Effect) of different functional groups. Sampling Techniques.

UNIT - IV

IV. Applications of UV and IR Spectroscopy

Applications of UV spectroscopy, Woodward Fieser rules for calculating λ_{max} of conjugated polyenes and α,β -unsaturated carbonyl compounds. Applications of IR spectroscopy, Absorption of Common functional Groups, Interpretation of simple IR spectra, Finger print Regions. Simple numerical problems based on UV and IR spectroscopy.

- 1. Organic Spectroscopy By W. Kemp; Publisher- Palgrave, New York
- 2. D.H. Williams and I. Fleming. Spectroscopic Methods in Organic Chemistry.
- 3. Spectrometric Identification of Organic Compounds R.M. Silverstein & F. X. Webster; Publisher: John Willey and Sons,Inc.
- 4. Introductory Problems in Spectroscopy- By R.C. Banks, E.R. Matjeha and G. Mercer; Publisher: The Benzamine / Cummings Publishing Company Inc.
- 5. Introduction to Spectroscopy D. L. Pavia, G. M. Lampman, and G. S. Kriz Publisher: Brooks / Cole, a part of cengage learning

Physical, Organic & Inorganic Aspects of Spectroscopy-A (Practical)

Time: 3 Hrs. Max. Marks: 16+04(Internal Assessment)

Periods: 4

Note. The question paper will be set by the examiner based on the syllabus.

- 1. Record of IR spectra of diethyl ether, ethyl acetate and butanone and make its comparisons.
- 2. Synthesis and electronic spectral studies of d-d bands of [Ni(NH)₃]Cl₂ and [Ni(en)₃]Cl₂ complexes. A comparison of their electronic spectra with that of [Ni(H2O)₆]Cl₂ for the calculation of 10Dq values.
- 3. Covert cyclohexanone to cyclohexanol and hydrazine of cyclohexanone. Compare the UV-Vis and IR spectra of te products with that of the starting material.
- 4. Preparation of $[Fe(py)_4(NCS)_2]$ and its IR characterization.
- 5. Take a commercial sample of methyl orange and record its UV-Vis and florescence spectra under neutral, acidic and basic medium and make comparisions.
- 6. To verify Beer-Lambert law for KMnO₄/K₂Cr₂O₇ and determine the concentration of given KMnO₄/K₂Cr₂O₇

BT-8 Term Paper

Max. Marks: 20

(i) On recent advances in Life Sciences using Internet and library based resources. To be presented as hard Copy/CD/Floppy. Viva/ seminar should be conducted by a panel of three internal examiners.

BT-1 rDNA Technology-B

Time: 3 Hrs. Theory: 32
Periods: 3
Int. assessment: 08
Total: 40

Note for the paper setters/examiners:

Each question paper will consist of three sections as follows:

Section-A: 8 very short answer type questions are to be set, two from each unit, the maximum length of answer can be about 1/3 of a page. All questions are compulsory. Each question will carry one mark, total weightage being 8 marks.

Section-B: This section will comprise of 8 questions, two from each unit. 5 questions to be attempted and maximum length of answer can be upto two pages. Each question will carry 3 marks, total weightage being 15 marks.

Section-C: This section will comprise of four essay type questions, one from each unit. Two questions to be attempted. Maximum length of answer can be upto 5 pages. Each question will carry 4.5 marks, total weightage being 9 marks.

UNIT I

Cloning vectors for Eukaryotes (TAC, YAC, BAC, Ti & Ri plasmids), Expression Vectors pET280, pGEX, role of promoter, cassettes and gene fusion, important components of shuttle vectors.

UNIT II

Overview of cloning, genomic cloning in (lambda) vector, cDNA cloning: Linker, Adapters, Different strategies for cDNA cloning- self priming and adaptor linker methods.

UNIT III

Principles & applications of PCR, Fundamental concepts & applications of microarray.

UNIT IV

DNA Sequencing: Sanger-Coulson method (chain terminating nucleotides), Maxam-Gilbert method (chemical degradation of DNA), Changing genes: site directed mutagenesis, cassette mutagenes, single primer method, PCR methods of site directed mutagenesis, Phage & plasmid display: selection of mutant peptides.

rDNA Technology-B (Practical)

Time: 3 Hrs. Practical: 16
Periods: 4 Int. assessment: 04
Total: 20

Note: The question paper will be set by the examiner based on the syllabus.

- 1. Isolation of plasmid DNA
- 2. Digestion of plasmid with three different restriction enzymes.
- 3. Preparation of competent cells
- 4. Transformation of competent cells by CaCl₂ method.
- 5. Confirmation of the transformants for the presence of plasmid.
- 6. Southern Blotting.

- 1. S.B. Primrose and R.M. Twyman; Principles of Gene Manipulation. 2006.
- 2. J. Sambrook and Michael R. Green; Molecular Cloning: A Laboratory Manual, (Fourth Edition), CSHL, 2012.
- 3. Brown TA, Genomes, 3rd ed. Garland Science 2006

BT-2 Applications of Plant Tissue Culture

Time: 3 Hrs. Theory: 32
Periods: 3
Int. assessment: 08
Total: 40

Note for the paper setters/examiners:

Each question paper will consist of three sections as follows:

Section-A: 8 very short answer type questions are to be set, two from each unit, the maximum length of answer can be about 1/3 of a page. All questions are compulsory. Each question will carry one mark, total weightage being 8 marks.

Section-B: This section will comprise of 8 questions, two from each unit. 5 questions to be attempted and maximum length of answer can be upto two pages. Each question will carry 3 marks, total weightage being 15 marks.

Section-C: This section will comprise of four essay type questions, one from each unit. Two questions to be attempted. Maximum length of answer can be upto 5 pages. Each question will carry 4.5 marks, total weightage being 9 marks.

Unit I

Micropropagation methods (axillary bud, shoot-tip and meristem culture), Stages of micropropagation, Factors affecting micropropagation and technical problems, Applications of micropropagation, Acclimatization of tissue culture raised plants. Modes of regeneration, Somatic embryogenesis and organogenesis, Types of somatic embryogenesis, Applications of somatic embryogenesis.

Unit II

Haploid and triploid plant production through tissue culture; ovary and ovule culture; embryo culture and rescuing hybrid embryos; somaclonal variations, selection of variant cell lines and its applications.

Unit-III

Protoplast isolation and culture, viability of protoplasts, protoplast fusion, selection of somatic hybrids and cybrids, applications of somatic cell hybridization.

Unit-IV

Cell suspension culture, production of secondary metabolites by plant tissue culture, immobilized plant cell culture, use of bioreactors in secondary metabolite production, transgenic approaches in secondary metabolite production.

Books:

- 1. Bhajwani, S.S, & Razdan, M.K. (1996). Plant Tissue Culture. Theory and Practice, Elsevier.
- 2. Razdan, M.K. (2003) Introduction to Plant tissue culture, Science Publishers
- 3. Singh, B.D. (2004). Biotechnology expanding horizons, Kalyani Publishers, New Delhi.

Applications of Plant Tissue Culture (Practical)

Time: 3 Hrs. Practical: 16
Periods: 4 Int. assessment: 04
Total: 20

Note: The question paper will be set by the examiner based on the syllabus.

- 1. Micropropagation and its different steps.
- 2. Significance of growth hormones in culture medium.
- 3. Induction of callus from different explants.
- 4. To study regeneration of shoots/embryos.
- 5. Raising of cell suspension cultures.
- 6. Anther culture, ovary culture and embryo rescue.

BT-3 Animal Biotechnology

Time: 3 Hrs. Theory: 32
Periods: 3
Int. assessment: 08
Total: 40

Note for the paper setters/examiners:

Each question paper will consist of three sections as follows:

- **Section-A:** 8 very short answer type questions are to be set, two from each unit, the maximum length of answer can be about 1/3 of a page. All questions are compulsory. Each question will carry one mark, total weightage being 8 marks.
- **Section-B:** This section will comprise of 8 questions, two from each unit. 5 questions to be attempted and maximum length of answer can be upto two pages. Each question will carry 3 marks, total weightage being 15 marks.
- **Section-C:** This section will comprise of four essay type questions, one from each unit. Two questions to be attempted. Maximum length of answer can be upto 5 pages. Each question will carry 4.5 marks, total weightage being 9 marks.

Unit- I

Commonly used animal cell line, their origin and characteristics (WI-38, MRC-5, IMR-90, TIG 1, HEK-293, 3T3, BHK21-C13, C7, CHO-K1, A-2790, A9, B16, HeLa, A 549), Differentiation of cells, Organ Culture

Unit-II

Transfection methods (calcium phosphate precipitation, DEAE-Dextran- mediated transfection, Lipofection, electroporation, Retroviral infection, Microinjection), Promoters, Expression vectors and detection of transgenics, need to express proteins in animal cells.

Unit- III

Applications: Cell fusion and production of monoclonal antibodies; scale up methods for propagation of anchorage dependent and suspension cell culture; Bioreactors for large scale culture of cells; micro carrier cultures; Stem cells-characterization of embryonic stem cells & their applications.

Unit-IV

Genetic Engineering in Animal Cells: Genetic engineering in production of regulatory proteins, blood products, vaccines and hormones; Transgenic animals (Mice, rabbit, Cattle, goat, sheep, pigs, Fish), Animal cloning- IVF & embryo transfer

- 4. Maulik, S. and Patel, S.D. (1997). Molecular Biotechnology Therapeutic Application and Strategies, John Wiley & Sons.

Animal Biotechnology (Practical)

Time: 3 Hrs. Practical: 16
Periods: 4 Int. assessment: 04
Total: 20

Note: The question paper will be set by the examiner based on the syllabus.

- 1. DNA isolation from blood
- 2. Spectrophotometric quantification of isolated DNA.
- 3. Resolving DNA on Agarose Gel.
- 4. Isolation of RNA from blood.
- 5. Separation and purification of IgG antibodies from Serum using protein A column.
- 6. Maintenance of a cell line and check doubling time.

Book Recommended:

1. Butler, M.C. (1991) Mammalian Cell Biotechnology. A practical approach. IRL, Oxford University Press.

BT-4 Intellectual Property Rights and Enterepreneurship

Time: 3 Hrs.

Periods: 3

Int. assessment: 08

Total : 40

Note for the paper setters/examiners:

Each question paper will consist of three sections as follows:

Section-A: 8 very short answer type questions are to be set, two from each unit, the maximum length of answer can be about 1/3 of a page. All questions are compulsory. Each question will carry one mark, total weightage being 8 marks.

Section-B: This section will comprise of 8 questions, two from each unit. 5 questions to be attempted and maximum length of answer can be upto two pages. Each question will carry 3 marks, total weightage being 15 marks.

Section-C: This section will comprise of four essay type questions, one from each unit. Two questions to be attempted. Maximum length of answer can be upto 5 pages. Each question will carry 4.5 marks, total weightage being 9 marks.

Unit I

Intellectual Property, Introduction to Intellectual Property Rights (IPR), History of IPR in India, Benefits, Problems and Management of IPR, Different forms of protection under IPR: Trade secret, Patents, Plant Breeder Rights and Copyright, Trademark and Geographical indications.

Unit II

Intellectual property and its legal protection in research, design and development, World Trade Organization and its related intellectual property provisions, General Agreement on Tariffs and Trade (GATT), Principles and objectives of GATT, Principles, objectives, structure and functions of WTO

Unit III

Trade related Investment Measures (TRIMs), Trade related aspects of IPR (TRIPS), TRIPS agreement, objectives and principles, Most Favored Nation (MFN) Principle, Berne convention, Budapest Treaty, International depository authorities, World Intellectual Property Organisation (WIPO)

Unit IV

Entrepreneurship, Characteristics of entrepreneur, Selection of a product line, design and development processes, Plant layout and design, Demand for a given product, Financing of Enterprise, Capital structure, Project inspection

Books:

- 1. Singh, I. and Kaur, B (2010) Patent law and Entrepreneurship, 3rd Edition, Kalyani publishers
- 2. Ahuja, V.K (2007) Law Relating to Intellectual Property Rights, 1st Edition

BT-5 BIOPROCESS ENGINEERING – B

Time: 3 Hrs. Theory: 32
Periods: 3 Int. assessment: 08
Total: 40

Note for the paper setters/examiners:

Each question paper will consist of three sections as follows:

- **Section-A:** 8 very short answer type questions are to be set, two from each unit, the maximum length of answer can be about 1/3 of a page. All questions are compulsory. Each question will carry one mark, total weightage being 8 marks.
- **Section-B:** This section will comprise of 8 questions, two from each unit. 5 questions to be attempted and maximum length of answer can be upto two pages. Each question will carry 3 marks, total weightage being 15 marks.
- **Section-C:** This section will comprise of four essay type questions, one from each unit. Two questions to be attempted. Maximum length of answer can be upto 5 pages. Each question will carry 4.5 marks, total weightage being 9 marks.

Unit-1

Design of a Fermenter:

Introduction, fermenter for microbial, animal & plant cell culture, Aseptic operation of fermenter, impeller and spargers, batch, fed batch, C.S.T.B.R, plug flow and air loop bioreactors and its kinetics.

Unit-II

Control and measurement equipments of fermenter, pH & D.O. probes, Operation and agitation and its kinetics.

Unit-III

Down Stream Processing: Introduction, removal of microbial cells and other solid matters. Foam separation, filtration, industrial filters and its principles, centrifugation and industrial centrifuges, cell disruption, aqueous two phase extraction system, super critical fluid extraction, whole broth processing.

Unit-IV

Effluent treatment, aerobic and anaerobic slug treatment process, fermentation economics.

BIOPROCESS ENGINEERING – B (Practical)

Time: 3 Hrs. Max Marks: 20

Periods: 4

Note: The question paper will be set by the examiner based on the syllabus.

Students will go for two week training in fermentation technology in industry/institute and the students will be required to submit written report of their training which will be evaluated by the teacher who has taught theory course.

BT-6 Biophysical and Biochemical Techniques- B

Time: 3 Hrs. Theory: 32
Periods: 3
Int. assessment: 08
Total: 40

Note for the paper setters/examiners:

Each question paper will consist of three sections as follows:

Section-A: 8 very short answer type questions are to be set, two from each unit, the maximum length of answer can be about 1/3 of a page. All questions are compulsory. Each question will carry one mark, total weightage being 8 marks.

Section-B: This section will comprise of 8 questions, two from each unit. 5 questions to be attempted and maximum length of answer can be upto two pages. Each question will carry 3 marks, total weightage being 15 marks.

Section-C: This section will comprise of four essay type questions, one from each unit. Two questions to be attempted. Maximum length of answer can be upto 5 pages. Each question will carry 4.5 marks, total weightage being 9 marks.

UNIT-I

Mass spectroscopy: Ionization methods and Analyzers, MALDI TOF and MALDI Q, Applications of mass spectroscopy in biology for qualitative and quantitative determination of bio-molecules, Introduction to fluorescence spectroscopy

UNIT-II

Electrophoresis: Factors affecting electrophoretic mobility, Types of electrophoresis, Basic principle, theory and application of native, SDS-PAGE and Agarose Gel electrophoresis, Use of solubilizers in electrophoresis.

UNIT III

Introduction to IEF (Iso-electric focusing), Two dimensional gel electrophoresis and capillary electrophoresis, Applications of electrophoresis in biology for isolation of biomolecules based on charge and molecular weight.

UNIT-IV

Radioisotopic Techniques: Basic concepts of radioisotopy, theory and applications of Geiger-Muller tube, solid and liquid scintillation counters, primary and secondary flours. Safety rules for radioisotopic studies.

Biophysical and Biochemical Techniques -B (Practical)

Time: 3 Hrs. Practical: 16
Periods: 4 Int. assessment: 04
Total: 20

Note: The question paper will be set by the examiner based on the syllabus.

- 1. Qualitative and quantitative analysis of DNA sample
- 2. Preparation of standard curve of protein
- 3. Preparation of standard curve of DNA.
- 4. Casting of vertical and horizontal gels for electrophoresis.
- 5. Separation of bio-molecules by vertical and horizontal gel electrophoresis

Physical, Organic & Inorganic Aspects of Spectroscopy-B

Time: 3 Hrs. Max.Marks:32+08(Internal Assessment)

Periods: 3

Note for the paper setters/examiners:

Each question paper will consist of three sections as follows:

Section-A: 8 very short answer type questions are to be set, two from each unit, the

maximumlength of answer can be about 1/3 of a page. All questions are

compulsory. Each question will carry one mark, total weightage being 8 marks.

Section-B: This section will comprise of 8 questions, two from each unit. 5 questions to

beattempted and maximum length of answer can be upto two pages. Each question

will carry 3 marks, total weightage being 15 marks.

Section-C: This section will comprise of four essay type questions, one from each unit.

Twoquestions to be attempted. Maximum length of answer can be upto 5 pages.

Each question will carry 4.5 marks, total weightage being 9 marks.

UNIT-I

I. Proton Magnetic Resonance spectroscopy (1H NMR)

The Nuclear spin, Larmor frequency, the NMR isotopes, population of nuclear spin level, spin and spin lattice relaxation. Measurement techniques (CW & FT method), solvent used.

Chemical shift, reference compounds, shielding constant, range of typical chemical Shifts simple application of chemical shifts, Anisotropic effect. Spin spin splitting, Coupling constant.

UNIT-II

II. Applications of NMR spectroscopy

NMR spectra with various examples such as ethyl bromide, ethanol, acetaldehyde, 1,1,2-tribromoethane, ethyl acetate, toluene, o-, m-, p- anisidine, o-, m-, p- nitrophenols, acetophenone. Simple numerical of structure elucidation of NMR spectroscopic data.

UNIT-III

III. Mass Spectrometery

Basic Principles Elementary theory. Molecular ions, isotope ions, fragment ions of odd and even electron types, Nitrogen rule, Factors affecting cleavage patterns, simple cleavage, cleavages at a hetero atom, multicentre fragmentations, rearrangements, diels – alder fragmentation, Mc Lafferty rearrangement.

UNIT-IV

IV. Applications of Mass Spectroscopy

Cleavage associated with common functional groups , Aldehydes, ketones cyclic and acyclic esters, alcohols, olefins, aromatic compounds amines, Interpretation of the spectrum of unknown simple molecules.

- 1. Organic Spectroscopy By W. Kemp; Publisher- Palgrave, New York

- 4. Introductory Problems in Spectroscopy- By R.C. Banks, E.R. Matjeha and G. Mercer; Publisher: The Benzamine / Cummings Publishing Company Inc.
- 5. Introduction to Spectroscopy D. L. Pavia, G. M. Lampman, and G. S. Kriz Publisher: Brooks / Cole, a part of cengage learning

Physical, Organic & Inorganic Aspects of Spectroscopy-B Practical

Time: 3 Hrs. Practical: 16
Periods: 4 Int. assessment: 04
Total: 20

Note. The question paper will be set by the examiner based on the syllabus.

- 1. Record the ¹H NMR spectra of ethyl acetate and ethyl acetoacetate (in CDCl₃ or CCl₄) and show the presence of the tautomeric structures.
- 2. Preparation of benzillic acid from benzaldehyde.(Green Chemistry Experiment)
- 3. Separation of components of spinach using column chromatography.
- 4. Prepare *p*-nitroacetanilde and make comparison of ¹H NMR spectral data of aniline, acetanlide(starting material) and *p*-nitroacetanide product.
- 5. Compare IR and ¹H NMR spectra of aspirin and salicyclic acid

BT-8

Max. Marks: 20

Educational Tour & Written illustrated reports. Viva should be conducted by a panel of three internal examiners.

SYLLABUS FOR

MASTER OF

SCIENCE

IN

BIOTECHNOLOGY

(Two years/Four semesters)
2017-18

Eligibility for M.Sc. in Biotechnology:

Pass with 50% aggregate marks in Bachelor's degree (Medical and allied Medical Sciences / Bio Sciences) or equivalent or relevant higher qualification.

Semester-wise marks distribution/course hours:

S.No.	Semester	Marks	Course Hours
1.	Ι	600	27
2.	II	625	30
3.	III	550	28
4.	IV	425	27
	Grand Total	2200	112

M.Sc. Biotechnology (Semester – I) Introductory Biomathematics and Biostatistics Session-2017-18 MBT-101

Theory: 80 marks
Int. assessment: 20 marks
Total: 100 marks
Time: 3 hours

Instructions for paper setters and candidates

The question paper will consist of five sections A, B, C, D and E. Section-A, B, C and D will have two questions from the respective sections of the syllabus and carry 15 marks each. Section-E will consist of 10 short answer type questions which cover the entire syllabus uniformly and will carry 20 marks in all. Candidates are required to attempt one question each from sections A, B, C and D of the question paper and the entire section E.

Unit - A

Binomial Theorem, Pascal rule and Pascal triangle. Scientific notation, significant digits, rounding off. Scientific notation, Sampling, problem identification, designing of experiment, factorial designs: full factorial design, fractional factorial design, concept of population and sample, random sampling, Data collection.

Unit-B

Measures of central tendency, mean, arithmetic mean, geometric mean & harmonic mean, medium, mode, quartile, deciles, percentile, dispersion, mean deviation, standard deviation, geometric standard deviation, standard error, coefficient of variation, variance, coefficient of determinant and coefficient of non-determinant, moments, distribution of data, skewness and kurtosis.

Unit-C

Pearson's correlation coefficient, linear correlation and regression, Effect of change of origin and scale on correlation -coefficient, Angle between regression lines, exponential curve. Power function, log-function, Partial correlation.

Unit-D

Probability, Addition and Multiplication law of Probability, Conditional Probability, Probability distribution function, Poisson distribution function, binomial distribution, , standard normal distribution, Testing of hypothesis, Null and alternative hypothesis, Type-I and Type-II errors, level of significance, two tailed and one tailed tests, Z-score, chi-square (χ^2) test, student 't' test, 'F' test, student 't' distribution, chi square (χ^2) distribution, Analysis of variance, ANOVA-one way ANOVA and two way ANOVA.

M. Sc. Biotechnology (Semester-I) Cell Biology (Theory) Session-2017-18 MBT 102

Theory: 80 marks
Int. assessment: 20 marks
Total: 100 marks
Time: 3 hours

Instructions for paper setters and candidates

The question paper will consist of five sections A, B, C, D and E. Section - A, B, C and D will have two questions from the respective sections of the syllabus and carry 15 marks each. Section - E will consist of 10 short answer type questions which will cover the entire syllabus uniformly and will carry 20 marks in all. Candidates are required to attempt one question each from sections A, B, C and D of the question paper and the entire section E.

SECTION -A

History of cell biology: Development of cell theory, First cell, evolution of metabolism, Present day Prokaryotes and Eukaryotic Cells

Diversity of cell size and shape: General organization of prokaryotic and eukaryotic cells, Development of multicellular organisms

Structural organization: Unicellular, colonial and multicellular forms; levels of organization of tissues, organs and systems

SECTION-B

Cell biology techniques: Microscopy-light, phase-contrast, fluorescence, confocal, scanning electron microscopy. Use of radioisotopes, cell culture, fractionation of cells contents.

Cell division and cell cycle: Mitosis and meiosis, their regulation, steps in cell cycle, and control of cell cycle, Growth and characteristics of cell division.

Regulators of cell cycle progression: MPF, families of cyclins and cyclin dependent kinases, Growth factors, cell cycle inhibitors.

SECTION-C

Cell motility: Cilia, flagella of eukaryotes and prokaryotes, their molecular mechanism.

Cell signaling: Hormones and their receptors, cell surface receptor, signaling through G protein coupled receptors, signal transduction pathways, second messengers, regulation of signaling pathways, bacterial and plant two-component signaling systems, bacterial chemotaxis and quorum sensing.

SECTION-D

Cell transport across membranes: Simple Diffusion, Facilitated diffusion, Active transport, Energetics of transport, Mechanism of sorting and regulation of intracellular transport, electrical properties of membranes.

Cellular communication: Regulation of hematopoiesis, general principles of cell communication, cell adhesion and roles of different adhesion molecules, gap junctions, extracellular matrix, integrins, neurotransmission and its regulation.

M. Sc. Biotechnology (Semester-I) Cell Biology (Practical) Session-2017-18 MBT 102

Practical : 20 marks
Int. assessment: 05 marks
Total : 25 marks
Time : 3 hours

- 1. Microscopic examination of bacteria, yeast and plant cell
- 2. Preparation of permanent slides of eukaryotic and prokaryotic cell.
- 3. Study of different stages of mitosis and meiosis.
- 4. Staining and visualization of different cell organelles.
- 5. Instrumental methods for cell biology-centrifugation, chromatography.
- 6. Histochemical techniques.

M. Sc. Biotechnology (Semester-I) Molecular Biology (Theory) Session-2017-18 MBT103

Theory: 80 marks
Int. assessment: 20 marks
Total: 100 marks
Time: 3 hours

Instructions for paper setters and candidates

The question paper will consist of five sections A, B, C, D and E. Section - A, B, C and D will have two questions from the respective sections of the syllabus and carry 15 marks each. Section - E will consist of 10 short answer type questions which will cover the entire syllabus uniformly and will carry 20 marks in all. Candidates are required to attempt one question each from sections A, B, C and D of the question paper and the entire section E.

SECTION -A

DNA: the vehicle of inheritance, chemical structure & base composition of nucleic acids, A, Band Z- DNA, double helical structures, forces stabilizing nucleic acid structure, super coiled DNA, properties of DNA, nucleic acid hybridization – cot curves.

DNA replication, Repair and Recombination: Replication initiation, elongation and termination in prokaryotes & eukaryotes, enzymes and accessory proteins involved in DNA replication, Fidelity; DNA repair- photoreactivation, nucleotide and base excision repair, mismatch repair, SOS response, gene amplification, mobile genetic elements.

SECTION -B

Prokaryotic transcription; transcription unit, promoters: constitutive and inducible, initiation, termination- rho dependent and independent. Eukaryotic transcription, promoters for RNA polymerase I, II and III, transcription factors, regulatory elements & mechanism of transcription regulation, post-transcriptional modifications: processing of hnRNA, rRNA & tRNA; 5'cap formation, 3'-end processing, polyadenylation and splicing.

SECTION -C

Genetic code, prokaryotic & eukaryotic translation, the translation machinery, isoaccepting tRNA, wobble hypothesis, mechanism of initiation, elongation & termination, ribosome recycling factor, tm RNA, regulation of translation, co & post translation modification of proteins and intracellular protein targeting import into nucleus, mitochondria and peroxiome, non-ribosomal polypeptide synthesis, prions.

SECTION -D

Regulation of gene expression in prokaryotes and eukaryotes; (operon concept; lac, trp and ara operons), RNA interference, Viral & cellular oncogenes, tumor suppressor genes from humans, structure, function & mechanism of action of p53 tumor suppressor proteins, Molecular mechanism of antisense molecules, ribozymes, applications of antisense & ribozyme technologies.

M. Sc. Biotechnology (Semester-I) Biochemistry (Theory) Session-2017-18 MBT104

Theory: 80 marks
Int. assessment: 20 marks
Total: 100 marks
Time: 3 hours

Instructions for paper setters and candidates

The question paper will consist of five sections A, B, C, D and E. Section - A, B, C and D will have two questions from the respective sections of the syllabus and carry 15 marks each. Section - E will consist of 10 short answer type questions which will cover the entire syllabus uniformly and will carry 20 marks in all. Candidates are required to attempt one question each from sections A, B, C and D of the question paper and the entire section E.

SECTION -A

Carbohydrates: Classification, characteristics and functions of monosaccharides, disaccharides- polysaccharides. Epimers, isomers, anomers, chiral carbon atom, chair and boat form, glucopyranose and fructopyranose.

SECTION -B

Amino acids & peptides: Classification, chemical reactions and physical properties

Proteins: Classification of proteins. Primary, Secondary (Alpha helix and beta pleated structure), Tertiary and Quaternary structures of proteins. Disulphide bridges, Ramachandran plot.

SECTION -C

Lipids: Definition and classification of lipids. Fatty acids- General formula, nomenclature and chemical properties structure, function and properties of simple, complex, acylglycerols, phosphoglycerides, sphingolipids, waxes, terpenes, steroids and prostaglandins.

Beta oxidation - Pathway and regulation. Role of acyl carnitine in fatty acyl transport. Synthesis of fatty acid - Structure and composition of fatty acid synthesis complex, pathway and regulation. synthesis of triacyl glycerides. Ketone bodies - Formation and utilization.

SECTION -D

Nucleic Acids: Structure of nucleoside, nucleotide. De novo and salvage pathways of nucleotide synthesis. Experimental evidence for nucleic acids as genetic material. Secondary structure of DNA, Watson and Crick model of DNA. A, B and Z forms of DNA, T_m and its relation to GC content.

Overview of metabolite pathways: Glycolysis, citric acid cycle, oxidative phosphorylation, pentose phosphate pathway and gluconeogenesis and their regulation; photosynthesis.

M. Sc. Biotechnology (Semester-I) Biochemistry (Practical) Session-2017-18 MBT104

Practical : 20 marks
Int. assessment: 05 marks
Total : 25 marks
Time : 3 hours

- 1. Theory & Application of Buffers & pH
- 2. Preparation of buffers: Phosphate buffer and Tris buffer
- 3. Quantitation of sugars: Anthrone method and Bradford method
- 4. Protein estimation: Lowry's method
- 5. Determination of saponification and acid value of fat.
- 6. Determination of Iodine number of fat.
- 7. Separation of amino acids by TLC.

Books Recommended:

- 1. Singh, S.P. (2006) Practical manual of Biochemistry. 6th Edition, CBS publication.

Publication, Chandigarh.

M. Sc. Biotechnology (Semester-I) General Microbiology, Microbial Physiology & Biotechnology (Theory) Session-2017-18 MBT 105

Theory: 80 marks
Int. assessment: 20 marks
Total: 100 marks
Time: 3 hours

Instructions for paper setters and candidates

The question paper will consist of five sections A, B, C, D and E. Section - A, B, C and D will have two questions from the respective sections of the syllabus and carry 15 marks each. Section - E will consist of 10 short answer type questions which will cover the entire syllabus uniformly and will carry 20 marks in all. Candidates are required to attempt one question each from sections A, B, C and D of the question paper and the entire section E.

Section - A

Principles of Microbiology: Principles and applications of bright field, dark field, phase contrast, fluorescence and scanning tunnelling microscopy.

Methods in Microbiology; pure culture techniques, theory and practice of sterilization, principles of microbial nutrition, microbial culture media, enrichment culture techniques, culture collection, culture purification and preservation methods.

Section-B

Prokaryotic cells: Organelle of microbes and their structure and functions. Cell wall types of Gram-positive and Gram-negative bacteria, capsules, Pili, Fimbriae, flagella. Classification of microorganisms based on their nutritional requirements. Sporulation and regeneration in bacteria. Brief comparison of archaea and eubacteria.

Section - C

Microbial Growth: Definition of growth, mathematical expression of growth, growth curve, diauxic and synchronous growth, effect of temperature, pH (acidity, basicity), oxygen and water availability on growth.

Virology: General characteristics, classic fication, ultrastructure of virus, viroids. Methods of isolation and purification of virus (T4,Mu, X174, M13 only). Lytic and lysogenic life cycles of virus.

Section- D

Bacterial Genetics: Recombination in bacteria, transformation, transduction, conjugation, plasmids; drug resistance in bacteria, transposons.

Bacterial classification: Bacterial classification according to Bergey's manual, 16S rRNA, % GC ratio, DNA-DNA homology, fatty acid analysis methods of classification.

M. Sc. Biotechnology (Semester-I) General Microbiology, Microbial Physiology & Biotechnology (Practical) Session-2017-18 MBT105

Practical: 20 marks
Int. assessment: 05 marks
Total: 25 marks
Time: 3 hours

- 1. To study the morphology and structural characteristics of different bacteria and fungi using light microscope.
- 2. To perform serial dilution of the soil sample to isolate bacterial and fungal CFU.
- 3. To perform the Gram staining of given bacterial samples isolated in above experiment.
- 4. To evaluate the microbiological quality of potable water by MPN/MTFT method.
- 5. To isolate bacterial or fungal DNA and purify it by gel electrophoresis.
- 6. To test for the antibiotic sensitivity of the bacterial sample.
- 7. To perform the MIC test for antibiotic sensitivity of a bacterial strain against a specific antibiotic.
- 8. Preservation/cryopreservation of a microbial strain.

M. Sc. Biotechnology (Semester-II) Environmental Biotechnology Session-2017-18 MBT201

Theory: 80 marks
Int. assessment: 20 marks
Total: 100 marks
Time: 3 hours

Instructions for paper setters and candidates

The question paper will consist of five sections A, B, C, D and E. Section - A, B, C and D will have two questions from the respective sections of the syllabus and carry 15 marks each. Section - E will consist of 10 short answer type questions which will cover the entire syllabus uniformly and will carry 20 marks in all. Candidates are required to attempt one question each from sections A, B, C and D of the question paper and the entire section E.

SECTION -A

Environmental Pollution and management: Types of pollution including electronic pollution, methods for the measurement of pollution, Air pollution and its control through Biotechnology; sources of water pollution, waste water treatment: physical, chemical and biological treatment processes. Microbiology of waste water treatments, aerobic and anaerobic process. Thin film techniques for waste water treatment using aquatic plants. Role of nanotechnology in environmental pollution control.

SECTION -B

Solid waste management with vermicomposting: Organic waste processing, composting, anaerobic digestion, vermiculture and vermicomposting, essential precautionary steps in vermicomposting, vermiculturing, vermiwash, overall benefits, economics and marketing. **Biomass production and Biofuels**: Introduction, plant biomass, sources of biomass, forest biomass, crop residues (cereals, leguminous crops, sugar cane etc.) aquatic biomass, wastes as a source of energy, composition of plant biomass (cellulose, hemicellulose and lignins), biomass conversion, biological and non- biological processes, useful products biomass (ethyl alcohol, methanol, methane), Application and future prospects, Recent trends in biofuel research.

SECTION -C

Biological nitrogen fixation and biofertilizer: The range of nitrogen fixing organisms, biochemistry of nitrogenase, genetics of nitrogen fixation, regulation of *nif* gene expression, symbiotic nitrogen fixation, genetic analysis of *Rhizobium* bacteria, regulation of nod gene expression, transfer of *nif* genes from *Klebsiella pneumoniae* to other organisms, application and future prospects. green manuring, the blue green algae, algalization, *Azolla*, present status and improvements.

SECTION -D

Bioremediation: Types of bioremediation, use of fungi, algae and bacteria in biosorption, ecological considerations, biodegradation of oil spills, surfactants, TNT wastes, dye stuff wastes, insecticides, herbicides, antibiotics. plastic menace, biodegradable plastics, volatile toxic gases and biofiltration.

M. Sc. Biotechnology (Semester-II) Environmental Biotechnology (Practical) Session-2017-18

MBT-201

Practical : 20 marks
Int. assessment : 05 marks
Total : 25 marks
Time : 3 hours

- 1. Determination of potable water quality in terms of coliforms, *Enterobacter*, *Shigella*, *Salmonella* qualitative assay.
- 2. Determination of BOD of given water/wastewater sample.
- 3. Determination of COD of given water/wastewater sample.
- 4. Isolation of *Rhizobium* from root nodule and mass cultivation.
- 5. Study the technique of vermicomposting.
- 6. Bioremediation of dyes using different fungi strains from soil.
- 7. Isolation of xenobiotic degrading microbes by enrichment culture technique.

M. Sc. Biotechnology (Semester-II) Immunology (Theory) Session-2017-18 MBT202

Theory: 80 marks
Int. assessment: 20 marks
Total: 100 marks
Time: 3 hours

Instructions for paper setters and candidates

The question paper will consist of five sections A, B, C, D and E. Section - A, B, C and D will have two questions from the respective sections of the syllabus and carry 15 marks each. Section - E will consist of 10 short answer type questions which will cover the entire syllabus uniformly and will carry 20 marks in all. Candidates are required to attempt one question each from sections A, B, C and D of the question paper and the entire section E.

SECTION -A

Introduction: Phylogeny of immune System, Innate and acquired immunity, Clonal nature of immune response, Organization and structure of lymphoid organs, Nature and biology of antigens and super antigens, Antibody structure and function, Antigen-Antibody interactions.

SECTION -B

Major histocompatibility complex, BCR & TCR, generation of diversity, Complement system. Cells of the Immune system: Heamtopoiesis and differentiation, lymphocytes trafficking, B-lymphocytes, T- lymphocytes, macrophages, dendritic cells, natural killer and lymphokine activated killer cell, eosinophils, neutrophils and mast Cells. Regulation of immune response: Antigen processing and presentation, generation of humoral and cell mediated immune responses, Activation of B- and T- lymphocytes, Cytokines and their role in immune regulation, T- cell regulation, MHC restriction, Immunological tolerance.

SECTION -C

Cell- mediated cytotoxicity; Mechanism of T cell and NK cell mediated lysis, antibody dependent cell mediated cytotoxicity, macrophage mediated cytotoxicity. Hypersensitivity. Autoimmunity.

SECTION -D

Transplantation, Immunity to infectious agents (intercellular parasites, helminthes & viruses), Tumor immunology, AIDS and other immunodeficiencies, Hybridoma Technology and Monoclonal antibodies.

M. Sc. Biotechnology (Semester-II) Immunology (Practical) Session-2017-18 MBT202

Practical : 20 marks
Int. assessment: 05 marks
Total : 25 marks
Time : 3 hours

- 1. Blood film preparation and identification of cells.
- 2. R.B.C. Counting.
- 3. Total leukocyte count & Differential leukocyte count
- 4. A.B,O Blood group testing
- 5. Direct and indirect haemagglutination assays.
- 6. Isolation of mononuclear cells from peripheral blood and viability test by dye exclusion method
- 7. Separation of serum / plasma from blood
- 8. Double immunodiffusion test
- 9. Dot Immuno blot assay (DIBA).

M. Sc. Biotechnology (Semester-II) Biophysical and Biochemical Techniques (Theory) Session-2017-18 MBT 203

Theory: 80 marks
Int. assessment: 20 marks
Total: 100 marks
Time: 3 hours

Instructions for paper setters and candidates

The question paper will consist of five sections A, B, C, D and E. Section - A, B, C and D will have two questions from the respective sections of the syllabus and carry 15 marks each. Section - E will consist of 10 short answer type questions which will cover the entire syllabus uniformly and will carry 20 marks in all. Candidates are required to attempt one question each from sections A, B, C and D of the question paper and the entire section E.

SECTION -A

Principles and application of light, phase contrast, fluorescence scanning and transmission electron microscopy, cytophotometry and flow cytometry, fixation and staining.

Centrifugation: Types of centrifuges and centrifugation, rotors and applications, ultracentrifuge-Analytical and preparative.

SECTION -B

Principles and techniques of nucleic acid: hybridisation and Cot curves; Sequencing of proteins and nucleic acids; Southern, Northern and South Western blotting techniques; Polymerase chain reaction. Principles and applications of gel filteration, ion-exchange and affinity chromatography, thin layer and gas chromatography, high pressure liquid (HPLC) chromatography

SECTION -C

Principles of biophysical methods used for analysis of biopolymeric structure, X-ray diffraction fluorescence UV/CD, visible NMR and ESR spectroscopy, hydrodynamic methods, Atomic absorption and plasma emission spectroscopy. Theory and application of Polyacrylamide and Agarose gel electrophoresis; Capillary electrophoresis; 2D Electrophoresis; Disc gel electrophoresis; Gradient electrophoresis; Pulsed field gel electrophoresis

SECTION -D

Radioactive & stable isotopes; Pattern and rate of radioactive decay; Units of radioactivity; Measurement of radioactivity; Geiger-Muller counter; Solid & Liquid scintillation counters (Basic principle, instrumentation & technique); Brief idea of radiation dosimetry; Cerenkov radiation; Autoradiography; Measurement of stable isotopes; Falling drop method; Applications of isotopes in biochemistry; Radiotracer techniques

M. Sc. Biotechnology (Semester-II) Biophysical and Biochemical Techniques (Practical) Session-2017-18 MBT 203

Practical: 20 marks
Int. assessment: 05 marks
Total: 25 marks
Time: 3 hours

- 1. Isolation of DNA and protein from biological samples.
- 2. Estimation of DNA and protein by Spectrophotometer
- 3. Preparation of standard curve of protein by Bradford method.
- 4. Electrophoresis of proteins-Native and denaturing PAGE.
- 5. Ion exchange chromatography of proteins.
- 6. Affinity chromatography of proteins
- 7. Thin layer chromatography of biomolecules.
- 8. Gel permeation chromatogrphy

M. Sc. Biotechnology (Semester-II) Genetic Engineering (Theory) Session-2017-18 MBT204

Theory: 80 marks
Int. assessment: 20 marks
Total: 100 marks
Time: 3 hours

Instructions for paper setters and candidates

The question paper will consist of five sections A, B, C, D and E. Section - A, B, C and D will have two questions from the respective sections of the syllabus and carry 15 marks each. Section - E will consist of 10 short answer type questions which will cover the entire syllabus uniformly and will carry 20 marks in all. Candidates are required to attempt one question each from sections A, B, C and D of the question paper and the entire section E.

SECTION -A

Restriction Enzymes; DNA ligase, Klenow enzyme, T4 DNA polymerase, Polynucleotide kinase, Alkaline phosphatase; Cohesive and blunt end ligation; Labeling of DNA: Nick translation, Random priming, Radioactive and non-radioactive probes,

SECTION -B

Plasmids; M13 mp vectors; pUC19 and Bluescript vectors, Phagemids; Lambda vectors; Insertion and Replacement vectors; Cosmids; Artificial chromosome vectors (YACs; BACs); Expression vectors; pMal; GST; pET-based vectors; Protein purification; His-tag; GST-tag; MBP-tag etc.; Intein-based vectors; Yeast vectors, Shuttle vectors, siRNA technology.

SECTION -C

Expression strategies for heterologous genes: vector engineering, codon optimization, host engineering, in vitro transcription & *in vitro* translation, expression in bacteria, expression in yeast, Inclusion bodies; Methodologies to reduce formation of inclusion bodies. Linkers; Adaptors; Homopolymeric tailing, strategies for cDNA libraries; Transformation; Northern, Southern and Colony hybridization, Southwestern and Far-western cloning; Phage display

SECTION -D

Cloning differentially expressed genes (mRNA differential display and subtractive cloning). DNA-Protein Interactions (Electromobility shift assay; DNaseI footprinting)

PCR and Its Applications

Primer design; Fidelity of thermostable enzymes (Taq & Pfu polymerases); DNA polymerases; Types of PCR – multiplex, nested, reverse transcriptase, real time PCR, touchdown PCR, hot start PCR, colony PCR, cloning of PCR products; PCR in gene recombination; SOEing; Site specific mutagenesis; deletion; addition;

M. Sc. Biotechnology (Semester-II) Genetic Engineering (Practical) Session-2017-18 MBT204

Practical : 20 marks
Int. assessment: 05 marks
Total : 25 marks
Time : 3 hours

- 1. Isolation of plasmid.
- 2. Making competent cells of *E.coli*.
- 3. Transformation of competent *E.coli* cells.
- 4. Cloning of foreign DNA insert in plasmid (PET Vector).
- 5. Isolation of total RNA.
- 6. Expression of fusion protein (His-tagged/MBD-tagged)
- 7. PCR.

- 1. Practical handbook of biochemistry and molecular biology (1989) by Gerald D. Fasman (CRC Press, Taylor and Francis Group).

M. Sc. Biotechnology (Semester- II) Computer Applications (Theory) MBT205

Time: 3 Hours

Total Marks: 100
Theory Marks: 80

Internal Assessment: 20

Instruction for paper setters and candidates

The Question paper will consist of five sections A, B, C and D. Section - A, B, and C will have two questions from the respective section of the syllabus and carry 20 marks each. Section D will consist of 10 short answer type questions which will cover the entire syllabus uniformly and will carry 20 marks in all. Candidate are required to attempt one question each from section A, B and C of the Question Paper and the entire section D.

Section – A

Introduction to digital computer organization, low level and high level languages, the binary number system. Programming techniques. Introduction to internet and its applications.

Introduction to MS-Excel , use of worksheet to enter data , edit data , move data, Use of inbuilt statistical functions for computations of mean, S.D. , Correlation, regression coefficient etc. Use of bar diagram, histogram, scatter plots, etc. graphical tools in EXCEL for presenting of data. Introduction to various statistical software packages.

Section - B

Introduction to programming in C, Overview , Character set, C Tokens, Keywords, Identifiers, Variables, Constant , Data Types, Comments, Structure of a C. Program Operators & Expression, Types of Operators , Precedence and Associativity, Expression , Statement and Types of statements Built-in functions: printf(), scanf(), getch(), getchar(), putchar(), header files, Pre-processor directives : #include, #define , Control Statements : If, If- else ,Nested If-else, switch ,while, do-while ,for ,Nested for loop ,break ,continue etc.

Section C

Arrays, One Dimensional arrays, Two Dimensional Arrays, storing data into arrays, searching and sorting, function, calling a function, passing arguments, call by reference, call by value, storing and displaying strings, structure & union.

Section -D

Introduction ,characteristics of Database approaches ,Database users, Schemas and Instances, DBMS Architecture and data independence Database language , Introduction to SQL, History , Basic Structure , DDL Commands(CREATE , ALTER ,DROP), DML Commands (SELECT , INSERT, UPDATE , DELETE), Simple Queries , Aggregate Functions, clauses (WHERE ,JOIN , DISTICT , ORDER BY , GROUP BY, HAVING and UNION).

M. Sc. Biotechnology (Semester- II) Computer Applications (Practical) MBT205

Time: 3 Hours

Total Marks: 25

Practical Marks: 20

Internal Assessment: 05

- 1. Write programmes to demonstrate conditional statements using c language.
- 2. Write programme to manipulate matrices.
- 3. To demonstrate array function.
- 4. To perform mail merge.
- 5. Use of Excel and Power Point.

M. Sc. Biotechnology (Semester-III) Animal Tissue Culture & Animal Biotechnology (Theory) Session-2017-18 MBT301

Theory: 80 marks
Int. assessment: 20 marks
Total: 100 marks
Time: 3 hours

Instructions for paper setters and candidates

The question paper will consist of five sections A, B, C, D and E. Section - A, B, C and D will have two questions from the respective sections of the syllabus and carry 15 marks each. Section - E will consist of 10 short answer type questions which will cover the entire syllabus uniformly and will carry 20 marks in all. Candidates are required to attempt one question each from sections A, B, C and D of the question paper and the entire section E.

SECTION -A

Concept of aseptic techniques in ATC; design and layout of ATC lab, Equipment for ATC lab. Laboratory safety and Biohazards, balanced salt solution and tissue culture media.

Detection of contamination, preservation, storage and shipment of cells. Growth of cells in the serum free hormone(s) supplemented medium, Role of CO₂ in culture medium.

SECTION-B

Dispersion and disruption of tissue, monolayer and suspension culture techniques, measurement

of growth and viability of cells in culture, maintenance of cultured cell line, primary and established cell line cultures, cell separation.

SECTION-C

Cell culture characteristics, scale up methods for propagation of anchorage dependent and suspension cell culture, concept of Bioreactors for mass culture of mammalian cells, microcarrier

culture. Three dimensional culture system and tissue engineering.

SECTION-D

Cell synchronization, cell transformation, cell immobilization techniques, Cell cloning and micromanipulation, animal cloning.

M. Sc. Biotechnology (Semester-III) Plant Tissue Culture &Plant Biotechnology (Theory) Session-2017-18 MBT 302

Theory: 80 marks
Int. assessment: 20 marks
Total: 100 marks
Time: 3 hours

Instructions for paper setters and candidates

The question paper will consist of five sections A, B, C, D and E. Section - A, B, C and D will have two questions from the respective sections of the syllabus and carry 15 marks each. Section - E will consist of 10 short answer type questions which will cover the entire syllabus uniformly and will carry 20 marks in all. Candidates are required to attempt one question each from sections A, B, C and D of the question paper and the entire section E.

SECTION -A

Introduction to cell and tissue culture, tissue culture as a technique to produce novel plants and hybrids, History of plant cell culture, Culture media types, Media composition, Plant growth regulators, Gelling agents, Cellular totipotency, Dedifferentian and Redifferentiation, Callus and cell culture, Organogenesis and embryogenesis.

SECTION-B

Micropropagation methods, stages of micropropagation, types, applications and limitations. Somatic embryogenesis types, protocol, media requirements, embryogenic callus, EDCs, advantages and disadvantages. Application of propagation techniques in crop improvement.. Acclimatization of micropropagated plantlets, Technical problems in PTC. Axillary bud, shoot tip and meristem culture. Embryo culture technique and rescuing hybrid embryos.

SECTION -C

Production of synthetic seed and their applications. Virus free plant production by PTC. Anther and microspore culture, Development of haploid plants, diploidization, applications. Protoplast isolation, culture and fusion, Somatic hybridization, Methods of somatic cell fusion, selection of somatic hybrids, cybrids and their applications. Somaclonal variations, isolation of useful variants at cellular level, Production of disease resistance, herbicide resistance and salt tolerance plants. Cryopreservation: factors influencing revival of frozen cells, applications and future prospects of freeze preservation.

SECTION -D

Secondary metabolites production: methods, applications and limitations. Prospects of genetic engineering of plants. Genetic colonization of plants by Agrobacterium infection and tumour growth, Ti – plasmids, neoplastic transformation of plant cells. Techniques for the production of transgenic plants. Crop improvement through transgenics, benefits and risk of producing transgenic plants, commercialization of transgenic plants.

M. Sc. Biotechnology (Semester-III) Plant Tissue Culture &Plant Biotechnology (Practical) Session-2017-18 MBT 302

Practical: 20 marks
Int. assessment: 05 marks
Total: 25 marks
Time: 3 hours

- 1) Methods of sterilization.
- 2) Preparation of media-MS (full strength, half strength).
- 3) Filter sterilization of thermo labile components
- 4) Micropropagation.
- 5) Effect of various growth hormones on cell division and cell proliferation
- 6) Callus induction & sub culturing, organogenesis.
- 7) Anther culture technique.
- 8) Acclimatization of tissue culture raised plantlets.

M. Sc. Biotechnology (Semester-III) Enzymology and Enzyme Technology (Theory) Session-2017-18 MBT 303

Theory: 80 marks
Int. assessment: 20 marks
Total: 100 marks
Time: 3 hours

Instructions for paper setters and candidates

The question paper will consist of five sections A, B, C, D and E. Section - A, B, C and D will have two questions from the respective sections of the syllabus and carry 15 marks each. Section - E will consist of 10 short answer type questions which will cover the entire syllabus uniformly and will carry 20 marks in all. Candidates are required to attempt one question each from sections A, B, C and D of the question paper and the entire section E.

SECTION -A

Classification and nomenclature of enzymes, enzyme properties and denaturation; Energetics of enzyme catalyzed reactions, transition state; Mechanism of enzyme action; Regulation of enzyme activity; Isoenzymes, co-factors and co-enzyme, Concept of active centre, binding sites, stereospecificity and ES complex formation, activation energy and transition state theory. Effect of temperature, pH and substrate concentration on reaction rate. Extraction, assay and purification of enzymes.

SECTION-B

Basic aspects of Enzyme Kinetics: Pre-steady state kinetics. Michaelis-Menten, Line Weaver-Burke, Eadie-Hofstee and Hanes-Woolf equations and Km value.

Enzyme inhibitors: Types of inhibitors–Reversible and irreversible, their mode of action and experimental determination.

Enzyme activity, international units, specific activity, turnover number, end point kinetic assay.

SECTION-C

Regulation of enzyme activity and concentration: Brief account of enzyme induction and repression, covalent modification, isoenzymes and allostery, ribozymes and abzyme.

Enzyme specificity. Evidences for enzyme substrate complex. Nueleophilic and electrophilic attack. Role of metal ions in enzyme catalysis.

Mechanism of enzyme action e.g. Lysozyme, chymotrypsin, DNA polymerase etc. zymogens and enzyme activation.

SECTION-D

Allosteric interactions and product inhibition: Complex kinetics and analysis.

Membrane bound enzymes- Extraction, assay, lipid-protein interaction and effect of fluidity on enzyme activity.

Enzymic bioconversions e.g. Starch and sugar conversion processes etc. Immobilization of Enzymes and their industrial applications.

M. Sc. Biotechnology (Semester-III) Enzymology and Enzyme Technology (Practical) Session-2017-18 MBT 303

Practical: 20 marks
Int. assessment: 05 marks
Total: 25 marks
Time: 3 hours

- 1. Extraction and purification of enzymes.
- 2. Effect of pH on enzyme activity and stability.
- 3. Effect of temperature on enzyme activity and stability.
- 4. Effect of metal ions on enzyme activity.
- 5. The effect of enzyme concentration on the rate of enzyme catalyzed reaction.
- 6. Effect of substrate concentration on enzyme activity and demonstration of the Km and Vmax of the reaction.
- 7. Effect of inhibitors on enzyme activity.
- 8. Immobilization of enzymes.

M. Sc. Biotechnology (Semester-III) Bioprocess Engineering & Technology (Theory) Session-2017-18 MBT304

Theory: 80 marks
Int. assessment: 20 marks
Total: 100 marks
Time: 3 hours

Instructions for paper setters and candidates

The question paper will consist of five sections A, B, C, D and E. Section - A, B, C and D will have two questions from the respective sections of the syllabus and carry 15 marks each. Section - E will consist of 10 short answer type questions which will cover the entire syllabus uniformly and will carry 20 marks in all. Candidates are required to attempt one question each from sections A, B, C and D of the question paper and the entire section E.

SECTION -A

Introduction: Historical development from Petri-plate, shake flask, Lab level bioprocess, pilot level to industrial level bioprocess engineering. Scale up of bioprocesses parameters. Growth parameters, growth rate, specific growth rate and biomass doubling, degree of multiplication, growth yield,Ydx/ds, Ydx/do₂, metabolic quotient, effect of substrate concentration on growth rate, Monod growth relation, saturation constants and its importance, biomass estimation.

SECTION -B

Bioreactors type: Introduction, Basic function of a bioreactor, microbial, animal and plant bioreactors. Aspectic operation and contamination. Sterilization of bioreactors, Body construction, Temperature control and measurement. Aeration and agitation, impellers, Stirrer, glands and bearings, packed gland seal, mechanical seal, magnetic drives, Baffles, different types of spargers, different ports, temperature probes. Dissolve oxygen probe. Valves and stream traps: Gate valves, globe valves. Piston valves, needle valves, plug valves, ball valves, butterfly valves, pinch valve, Diaphragm valves, check valves, pressure control valves, pressure reduction and retaining valves, safety valves, steam traps.

Bioreactor vessels, Wald hof-type acetators and cavitators, tower bioreactor, cylindroconical vessels, air lift bioreactors, deep jet bioreactor, cyclone column, packed tower, rotating disc bioreactor.

SECTION -C

Mass and Gas transfer in Microbial systems: Introduction, The oxygen requirement for industrial bioreactors, oxygen demand and supply and balance between them, volumetric oxygen transfer, determination of KLa values, sulphite oxidation techniques, gassing out techniques: static method and dynamic method, oxygen balance method. Fluid rheology: Bingham plastic, pseudo plastic, Dilatants, Casson body. Factors affecting KLa values in bioreactors, the effect of medium rheology on KLa values, scale up and scale down of airation and agitation

SECTION -D

Sterilization

Introduction, medium sterilization, design of batch sterilization process, del factor, sterilization cycle, Richards rapid method for design of sterilization cycles, batch sterilization, scale up of batch sterilization, continuous sterilization, sterilization of feed, sterilization of wastes. Filter sterilization, filter sterilization of media and air, Depth filters design and theory.

M. Sc. Biotechnology (Semester-III) Bioprocess Engineering & Technology (Practical) Session-2017-18 MBT304

Practical: 20 marks
Int. assessment: 05 marks
Total: 25 marks
Time: 3 hours

- 1. Determination of TDS, pH and conductivity of given wastewater sample after standardization of given probes/instruments.
- 2. Screening and Isolation of cellulose degrading microbes.
- 3. Bioremediation of dyes using different fungal/bacterial strain isolated from soil at shake flask level.
- 4. To study the parts of a bioreactor working and functioning of any bioreactor studied in theory paper by bioreactors assembling and dismantling.
- 5. Sterilization of fermenter and fermentation media.
- 6. To characterize and isolate the effluent decolourisation product by TLC/GLC.
- 7. Determinations of thermal death point (TDP) and thermal death time (TDT) of microbes for designing of sterilization.
- 8. Study the effect agitation on aeration and determination of KLa volumetric oxygen transfer rate in the bioreactor by dynamic gassing out technique.

M. Sc. Biotechnology (Semester-III) Seminar/Journal club/Assignment Session-2017-18 MBT305

To make the students conversant with latest happening in the field of Biotechnology and to improve their communicational skill, seminars covering latest topics in Biotechnology have been included in the curriculum. Each candidate will deliver seminar on recent developments in Biotechnology or on important recent scientific discovery published in prestigious scientific journals. Presentation of Seminars will carry 25 marks. An objective type common paper of 25 marks on all the seminars will be taken at the end of the session. The question paper will be set and evaluated by a board of three internal examiners.

M. Sc. Biotechnology (Semester-IV) **Genomics and Proteomics** Session-2017-18 **MBT401A**

Theory **: 80 marks** Int. assessment: 20 marks : 100 marks Time : 3 hours

Instructions for paper setters and candidates

The question paper will consist of five sections A, B, C, D and E. Section - A, B, C and D will have two questions from the respective sections of the syllabus and carry 15 marks each. Section - E will consist of 10 short answer type questions which will cover the entire syllabus uniformly and will carry 20 marks in all. Candidates are required to attempt one question each from sections A, B, C and D of the question paper and the entire section E.

SECTION -A

Whole genome analysis: Preparation of genomic library in vectors, ordered cosmid libraries, BAC libraries, shotgun libraries, comparative genomes (Arabidopsis, rice and panda) DNA sequencing: conventional sequencing (Sanger, Maxam and Gilbert), pyrosequencing, next generation sequencing, automated sequencing, translation to large scale projects, epigenomics, cancer genomes.

SECTION -B

FISH, Comparative Genomic Hybridization (CGH), SKY (Spectral Karyotyping).

DNA Microarrays: Chemical DNA synthesis, Printing of oligonucleotides and PCR products on glass slides, nitrocellulose paper. Fluorescence based assay formats and signal amplification strategies, Analysis of single nucleotide polymorphism using DNA chips.

Gene Identification and Expression Analysis: DNA microarrays, ESTs, SAGE, MPSS.

SECTION -C

Proteome analysis: Two dimensional separation of total cellular proteins, isolation and sequence analysis of individual protein spots by mass spectroscopy. Protein microarrays, differential display proteomics, yeast 2-hybrid system, FRET, bimolecular fluorescence complementation assay.

SECTION -D

Advantages and disadvantages of DNA and protein microarrays. Total expression vs functional proteomics, oligosaccharide microarrays for glycomics, pharmacogenomics, introduction to metabolomics.

M. Sc. Biotechnology (Semester-IV) Introduction to Bioinformatics Session-2017-18 MBT401B

Theory: 80 marks
Int. assessment: 20 marks
Total: 100 marks
Time: 3 hours

Instructions for paper setters and candidates

The question paper will consist of five sections A, B, C, D and E. Section - A, B, C and D will have two questions from the respective sections of the syllabus and carry 15 marks each. Section - E will consist of 10 short answer type questions which will cover the entire syllabus uniformly and will carry 20 marks in all. Candidates are required to attempt one question each from sections A, B, C and D of the question paper and the entire section E.

SECTION -A

Introduction to Bioinformatics: History of Bioinformatics, milestones, Genome sequencing Projects, Human Genome Project, objectives and applications of Bioinformatics. Introduction to databases: Type and kind of databases, e.g. PUBMED, MEDLINE Nucleic acid and protein databases: GenBank, EMBL, DDBJ, SWISS PROT, INTERPRO, UNIPROT. Genome project TIGR database, SGD, PLASMODB Data format

SECTION -B

Sequence alignment: Scoring matrices, PAM, BLOSUM, Local and global alignment concepts; Dot matrix sequence comparison; Dynamic programming; Needleman-Wunch algorithm, SmithWaterman algorithm;

SECTION -C

Database searches for homologous sequences, FASTA and BLAST, PSSM searching, PSIBLAST and PHI-BLAST, Multiple sequence alignment; Phyllogenetic analysis Motifs and Pattern Databases: PROSITE, Pfam, BLOCKS, PRINTS

SECTION -D

Protein sequence analysis tools, secondary structure prediction, tertiary structure prediction homology modelling, fold recognition, ab initio methods structure visitualization and analysis tools, rasmol chimera spdviwer, Structure analysis Structural databases: PDB, PDBsum, NDB etc. SCOP, CATH

M. Sc. Biotechnology (Semester-IV) Medical Biotechnology Session-2017-18 MBT402A

Theory: 80 marks
Int. assessment: 20 marks
Total: 100 marks
Time: 3 hours

Instructions for paper setters and candidates

The question paper will consist of five sections A, B, C, D and E. Section - A, B, C and D will have two questions from the respective sections of the syllabus and carry 15 marks each. Section - E will consist of 10 short answer type questions which will cover the entire syllabus uniformly and will carry 20 marks in all. Candidates are required to attempt one question each from sections A, B, C and D of the question paper and the entire section E.

SECTION -A

Cellular therapy; Stem cells: definition, properties and potency of stem cells; Sources: embryonic and adult stem cells; Genetically engineered stem cells in cancer treatment, Concept of tissue engineering; Role of scaffolds; Role of growth factors; Role of adult and embryonic stem cells; Clinical applications; Ethical issues

SECTION -B

Immunotherapy: Cancer immunotherapy; Role of cytokine therapy in cancers; Monoclonal antibodies and their role in cancer; Role of recombinant interferons; Immunostimulants; Clinical transplantation and immunosuppressive therapy; Vaccine development; recombinant vaccines and clinical applications.

SECTION -C

Gene therapy; Intracellular barriers to gene delivery; Overview of inherited and acquired diseases for gene therapy; Retro and adeno virus mediated gene transfer; Liposome and nanoparticles mediated gene delivery Recombinant therapy; Clinical applications of recombinant technology; Erythropoietin; Insulin analogs and its role in diabetes; Recombinant human growth hormone; Streptokinase and urokinase in thrombosis; Recombinant coagulation factors

SECTION -D

Genetic markers-Biomarkers in early drug development; Biomarkers in Clinical development; Biomarkers for molecular Diagnostics- example of cancer biomarkers; IVET

Drugs; Types of Drugs - examples of latest drugs; steps in drug designing, HTS, In silico drug designing, structure based drug designing, methods of docking concept of ADME metabolism & Drug Excretion; QSAR; Drug Legislation & safety.

M. Sc. Biotechnology (Semester-IV) Intellectual Property Rights Session-2017-18 MBT402B

Theory: 80 marks
Int. assessment: 20 marks
Total: 100 marks
Time: 3 hours

Instructions for paper setters and candidates

The question paper will consist of five sections A, B, C, D and E. Section - A, B, C and D will have two questions from the respective sections of the syllabus and carry 15 marks each. Section - E will consist of 10 short answer type questions which will cover the entire syllabus uniformly and will carry 20 marks in all. Candidates are required to attempt one question each from sections A, B, C and D of the question paper and the entire section E.

SECTION -A

Introduction to intellectual property rights and its different forms.

Ownership of Tangible and Intellectual Property, Farmers Rights, Animal and Plant breeders rights, Brief history of IPR system in India.

SECTION -B

Development of patent system in India. Introduction to Indian Patent law, Basic requirements of patentability, patentable subject matter, Non obviousness, Compulsory licensing, Patent infringements and revocation,

SECTION -C

World Trade Organisation and its related intellectual property provisions, TRIPS agreement, Patent Cooperation treaty, Budapest treaty.

Patent Litigation: Substantive Aspects of Patent Litigation, Procedural Aspects of Patent Litigation

SECTION -D

Recent Development in Patent System and Patentability of Biotechnology invention Special issues in Biotechnology Patents: Disclosure Requirements, Collaborative and competitive research, Challenges for the Indian Biotechnological research and industries.

M. Sc. Biotechnology (Semester-IV) Microbial Biotechnology Session-2017-18 MBT402C

Theory: 80 marks
Int. assessment: 20 marks
Total: 100 marks
Time: 3 hours

Instructions for paper setters and candidates

The question paper will consist of five sections A, B, C, D and E. Section - A, B, C and D will have two questions from the respective sections of the syllabus and carry 15 marks each. Section - E will consist of 10 short answer type questions which will cover the entire syllabus uniformly and will carry 20 marks in all. Candidates are required to attempt one question each from sections A, B, C and D of the question paper and the entire section E.

SECTION -A

Introduction to microbial technoloogy, Microbial metabolites: Primary & Seondary, microbial applications in food and health care industries.

Introduction to microbial genomes, phylogenetic relationships between various genera of microbes- 16SrRNA sequencing and Ribosomal Database project

SECTION -B

Prokaryotic genome organization, chromids, Bacterial and viral metagenomics, synthetic genomics, microbial sequencing projects, comparative genomics of relevant organisms such as pathogens and non-pathogens, human microbiome project.

SECTION-C

Microbial biofilms, polyketide synthase, antibiotic resistance, extremophiles and extremophilic

biocatalysts, lantibiotics, biosynthesis of nanomaterials, probiotics, microbial degradation of xenobiotics, viral enzymes in modern biotechnology and clinical applications.

SECTION -D

Microbial bio-products : penicillin G, Microbial Enzymes : amylases, cellulases, cellobiohydrolase, endoglucanase, cellobiase, β -glucosidase, proteases. Microbial cultures, microbial product recovery.

Alcohol biotechnology: Beer, Whisky, and Wine. Microbial culture, fermentation media, microbial bio-processes and product recovery for beer, whisky and wine.

M. Sc. Biotechnology (Semester-IV) Educational Tour/Industrial Visit Session-2017-18 MBT403

To enrich students' learning experiences and to help them to acquire practical knowledge about the subject, industrial visits will be arranged by the Department. The students are required to submit written report about the visit at the end of semester. Viva voce will be conducted.

M. Sc. Biotechnology (Semester-IV) Research Project Session-2017-18 MBT404

To give the students sufficient experience and proficiency in the research methodology and to enable them to carry out independent research, projects will be assigned to the students as per individual interest and availability of specialized faculty. The project report will be submitted in the form of dissertation. The project will be presented for evaluation at the end of semester and viva voce examination will be conducted
