Activity – Awareness Programme on “Paddy Residue Management “

It is estimated that 500-550 metric tons of crop residues are produced per year in the country. However, a large portion of the residue is burnt on farms primarily to clear the fields which leads to deterioration of human and soul health. To apprise the agriculture students about gravity of the problem, a One-day Awareness Programme on “Paddy Residue Management” was organised in P.G. Department of Agriculture Khalsa college Amritsar in collaboration with Krishi Vigyan Kendra, Nag kalan, Amritsar on 06/02/2020. 75 (seventy five) Students of the Agriculture Department participated in it. Dr. Bhupinder Singh Dhillon, Deputy Director, KVK, Amritsar familiarized the students about the various schemes and subsidies provided by the Government and PAU Ludhiana. Following competitions were organised for the students on the Theme to make them aware of the harmful effects of paddy residue burning.

Activity Report

Name of Activity	Seminar on "Business Opportunity"
Date	31-01-2020
Resource Person	Dr. Vishal R Parate from Indian Institute of Food Processing Technology Bathinda
No. of participants	81

Department of Food Science and Technology, Khalsa College Amritsar organized a seminar on **Business opportunity in Food Industries on 31st Jan, 2020. Dr. Vishal R Parate from Indian Institute of Food Processing Technology Bathinda** was the keynote speaker. Dr. Gursharan Kaur initiated the seminar by giving welcoming speech. Dr. Manbir Singh, HOD and Dr. M.S. Batra, Director SDC honored the guest by presenting a flower bouquet. Around 80 students and teachers from the department participated in this seminar. Dr. Parate shared his view that food business is neither difficult nor an easy task. It has both opportunities as well as challenges. Food commodities are always in demand because everyone needs it. This means that until we stop needing food, which is not happening, there will always be a demand for food. Dr. Parate has discussed that the food industry in India has shown significant growth and financial potential due to which there are numerous opportunities available here as well. He explained that the food and grocery market in India is the sixth largest in the world in terms of volume. There have been many changes over the years, including an increase in processed food consumption worldwide due to better health awareness, convenience needs, and growing awareness of the importance of nutrition. He also discussed about the past and the present status of food processing sector in India and role of irradiation facilities, cold storage facilities, packaging centers for food processing and preservation thereby, increasing the demand for Indian processed food has increased in the international markets. The seminar was very interactive and full of knowledge for the students. Dr. Sandeep Singh extended vote of thanks at the end of this session.
